

Dear Howard County Business Leader:

The Howard County Public School System (HCPSS) is considered one of the finest educational systems in the country. It is a **positive force** for both attracting and developing a quality workforce and economic engine for our county. As a business leader, we know that you recognize the value of this resource and we ask you to join our efforts to ensure its continued success.

The challenge of identifying, attracting, and retaining qualified professionals is one in which we all have a stake. It is essential for us to demonstrate that our entire community **shares a commitment** and passion for quality education. By joining its roster of valued partnerships with the local business community, your organization will help to reinforce the premier ranking of the HCPSS among teaching and educational opportunities across the nation.

Join our **partnerships for education** by identifying an **exclusive discount or other benefit(s)** your organization can offer to the nearly 8,000 teachers and other staff throughout the county. The HCPSS recruitment materials, EIP intranet site, Partnerships Annual Report, and other communications will promote your organization and the commitment you have made to the quality of education.

We look forward to your participation in this important initiative!
