

Pharmacy Management Program HCPSS –RX-Plan

UnitedHealthcare's pharmacy management program provides clinical pharmacy services that promote choice, accessibility and value. The program offers a broad network of pharmacies (more than 56,000 nationwide*) to provide convenient access to medications.

Most pharmacies participate in our network. However to confirm network participation for a particular pharmacy, we suggest that you first check with your pharmacist or visit our online pharmacy service at www.myuhc.com. The online service offers you home delivery of prescriptions, the ability to view personal benefit coverage and provides you with access to health and well being information, and even location of network retail neighborhood pharmacies by zip code.

Copayment per Prescription Order or Refill

Your Copayment is determined by the tier to which the Prescription Drug List Management Committee has assigned the Prescription Drug Product. All Prescription Drug Products on the Prescription Drug List are assigned to Tier 1, Tier 2 or Tier 3. Please access www.myuhc.com through the Internet, or call the Customer Service number on your ID card to determine tier status.

For a single Copayment, you may receive a Prescription Drug Product up to the stated supply limit. Some products are subject to additional supply limits. You are responsible for paying the lower of the applicable Copayment or the retail Network Pharmacy's Usual and Customary Charge, or the lower of the applicable Copayment or the Home Delivery Pharmacy's Prescription Drug Cost, in addition to any Ancillary Charge.

** For Maintenance Medications, as written by the provider: Up to a consecutive 31 day supply for a new prescription or a change in prescription of a Prescription Drug Product: and thereafter, up to a consecutive 90 day supply of a Prescription Drug Product (for the payment of a Copayment of up to 2.5 times the Copayment for a 31 day supply).

Also note that some Prescription Drug Products require that you notify us in advance to determine whether the Prescription Drug Product meets the definition of a Covered Health Service and is not Experimental, Investigational or Unproven.
