Board's Proposed FY 2021 Capital Budget Capital Improvement Program FY 2022–2026 Long-Range Master Plan FY 2021–2030

Section 1

Executive Summary

Introduction

This document contains the Howard County Public School System's (HCPSS) Board's Proposed FY 2021 Capital Budget and the FY 2022–2026 Capital Improvement Program (CIP) schedules. Projects are presented for the next fiscal year and future years, documenting longrange plans for the system.

The capital budget process, detailed within the Executive Summary, links capital planning with attendance area planning and addresses long-range planning issues identified in the annual feasibility study. Presented to the Board of Education on June 13, 2019, the Feasibility Study provided new enrollment projections and possible future boundary scenarios. Several factors affect the total FY 2021 Capital Budget. This year's capital improvement program provides for student capacity, renovations, and various other improvements that staff, parents, and community leaders have identified as needed. The formula used by the state to calculate school construction costs has increased to \$391 per square foot. Project

budgets have increased to reflect rising costs such as the requirement to pay prevailing wages on all projects after July 1, 2014, costs to comply with LEED, and inflation.

The Superintendent's Proposed Capital Budget is the first step in this annual process which will ultimately end with the Board of Education's Approved Capital Budget in May 2020. The capital budget is submitted much earlier than the operating budget to accommodate deadlines associated with submission of the State capital budget to the Interagency Commission on School Construction.

Executive Summary provides an introduction to the Board's Proposed FY 2021 Capital Budget, the Capital Improvement Program FY 2022–2026, and the Long-Range Master Plan FY 2021–2030. It presents a high level overview of the budget process and the FY 2021 Proposed Capital Budget. Included in the Executive Summary is the Superintendent's Message, which provides an overview of the budget issues. Other information found in the Executive Summary is enrollment projections and student capacities, the capital budget schedule, and information on the capital budget process.

System Information presents information on the school system with a map of school locations throughout the county.

Project Detail presents detail on each project presented in the proposed FY 2021 Capital Budget as well as information on long range projects.

Supporting Data includes data from the feasibility study, detailed enrollment data, school and region tests for Adequate Public Facilities Ordinance (APFO), and facilities constructed and/or renovated with state funds.

Message from the Superintendent

Dear Howard County community,

The Board's Proposed FY 2021 Capital Budget, FY 2022-2026 Capital Improvement Program and the FY 2021-2030 Long-Range Master Plan for the Howard County Public School System provide a framework for school system facilities that give all students and staff equitable opportunities to learn and achieve.

The FY 2021 Board Proposed Capital Budget includes the funds needed to continue progress on our three major capital project priorities. My Proposed Capital Budget was based upon projections of state and local funding availability and was presented on September 10, 2019,

alongside a budget scenario dated September 5, 2019, which was based on the advancement of the FY 2020 Capital Budget. This document reflects the Board's Proposed Capital Budget as approved on September 19, 2019, including the decision to move forward with planning for all capital projects pending further discussion with state and county funding authorities. We have continued to advocate for our capital needs at the state and local level. On December 12, 2019, the Interagency Commission on Public School Construction approved 75% of available FY2021 State school construction funding, which provided allocations for New High School #13. On December 17, the Board voted to proceed with all three top priority projects as currently scheduled and postponed final action on the capital budget until information about construction contract costs becomes available in spring 2020.

Equity is at the foundation of our Capital Budget planning, which is intrinsically linked with the Operating Budget, redistricting process and our goal to eliminate the Health Fund deficit, with all components working together to fulfill the goals and priorities of our Strategic Call to Action. The Capital Budget adds improvements and capacity where they are most urgently needed to relieve crowded schools and ensure the equitable allocation of instructional resources. It provides for the facilities that are essential to allow consistent delivery of high quality instructional programming in every Howard County school, so that every student may reach their full potential in the classroom and beyond. It reflects the priorities of our school system and our community for supporting our children and maintaining excellence in instruction by leading with equity.

The \$99.1 million Capital Budget, \$409 million Capital Improvement Program and \$781.1 million Long-Range Master Plan for FY 2021-2030 support our ultimate goal to build an inclusive, nurturing environment for every student and close opportunity gaps, and address projected student capacity and existing facility needs. The Capital Improvement Program and Long-Range Master Plan address existing and projected facility needs to support our system's projected growth of 7,100 additional students between 2020 and 2030.

Message from the Superintendent

FY 2021 Capital Budget Highlights

- Talbott Springs Elementary School Replacement, scheduled for opening in September 2022
- New High School #13, scheduled for opening in September 2023
- Hammond High School Renovation/Addition, scheduled for opening in September 2023
- Systemic renovations to HVAC, boilers and other equipment

FY 2021-2030 Long-Range Master Plan Highlights

- Funding for two future new elementary schools
- Funding for future High School #13, which is needed to meet projected enrollment growth
- Provides for the addition of 3,850 seats
- \$224 million in systemic renovations for modernization and major programmatic renovations to existing school facilities
- Renovations to address deferred maintenance and additions to add needed seats at current middle school facilities

This budget provides the facilities that are essential to giving each and every student access to the high quality educational opportunities that lead to lifelong success, in a learning environment where every student is nurtured and fully supported in their learning and growth.

Rising costs and continued increasing enrollment have led to school system capital needs that will require an increase to historical funding levels by the county and state. We know that resources are limited and there are many competing needs. I am committed to working collaboratively with our state and county partners to secure the funding that is necessary to move these projects forward.

I want to acknowledge the stakeholder feedback that helped develop this budget. Thank you to our community, County Executive and Council, State Delegation, and Board of Education members for their support for our school system. Through our ongoing partnerships, we can continue to successfully advance our vision of equity and support for instructional growth.

The FY 2021 Capital Budget schedule is detailed at the end of the Executive Summary and includes the dates of Board public hearings and work sessions.

Sincerely,

Michael J. Martirano, Ed.D. Superintendent

HCPSS Strategic Call to Action

HCPSS Strategic Call to Action

Learning and Leading with Equity The Fierce Urgency of Now

Vision

Every student and staff member embraces diversity and possesses the skills, knowledge and confidence to positively influence the larger community.

Mission

HCPSS ensures academic success and social-emotional well-being for each student in an inclusive and nurturing environment that closes opportunity gaps.

Four Overarching Commitments

VALUE

Every HCPSS stakeholder feels happy and rewarded in their roles and takes pride in cultivating the learning community.

ACHIEVE

An individualized focus supports every person in reaching milestones for success.

CONNECT

Students and staff thrive in a safe, nurturing and inclusive culture that embraces diversity.

EMPOWER

Schools, families and the community are mutually invested in student achievement and well-being.

Desired Outcomes

- Equity and relationships are at the foundation of all decisions and actions.
- Students' **social-emotional learning** is nurtured through life skills development and collaborative dialogue, such as **restorative practices** to solve problems.
- **Graduation rates** among all high schools and each demographic group are at exemplary levels.
- Students graduate with the skills, attributes and knowledge necessary to acquire **meaningful and rewarding employment** in a dynamic international workplace.
- All students have equitable opportunities to earn college credit or industry certification.
- Through collaboration with families and the greater community, all students enter kindergarten **ready to learn**.
- Each and every student receives a high-quality education through **individualized** instruction, challenges, supports and opportunities.
- High quality **special education** services are delivered in a consistent and collaborative manner.

- **Curriculum** is based on standards and best practices, implemented with fidelity, and aligned with meaningful **assessments** that provide actionable data for instructional planning.
- Students see **diversity and inclusion** reflected in the curriculum, and respect the contributions of all populations.
- Staff reflect the **diversity** of the student and community population.
- Parents, guardians and community members trust in the integrity of the school system and are active and valued partners.
- All staff feel valued, are effective in their roles, and have equitable access to additional opportunities through professional learning and leadership development.
- Organizational **culture and climate** are supportive and nurturing, and provide a **safe** and healthy environment for all.
- All operations and practices are **responsive**, accountable, efficient and **student-centered**.

\$781,100 Ten-Year Long-Range Master Plan =

Board of Education's Proposed

Capital Planning

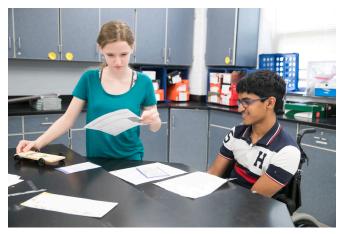

Capital planning is an ongoing process where the annual Capital Improvement Program (CIP) and Long-Range Master Plan are updated to reflect changes in enrollments, building capacities, and other conditions. The HCPSS provides other relevant publications, which should be taken as a whole with the capital budget. These include the Feasibility Study, Educational Facilities Master Plan, and the Comprehensive Maintenance Plan.

The formulation of the FY 2021 Capital Budget, FY 2022–2026 Capital Improvement Plan, and the FY 2021–2030 Long-Range Master Plan begins with the annual completion of enrollment projections first presented in the 2019 Feasibility Study. The results of this projection are also included in this document in pre- and post-measures charts. Capacities of schools dictate the calculation of capacity utilization percentage, a measure which allows the effect of school projections to be illustrated in a meaningful way. A school with capacity utilization over 110 percent is deemed to be over-utilized, while a school below 90 percent capacity utilization is deemed to be under-utilized. This range is set by Board of Education policy.

Boundary Review

School attendance area adjustments are an integral part of the CIP. The HCPSS is responsible for ensuring that school buildings in the county are run efficiently and effectively. This means keeping schools at or near capacity and ensuring that most available seats are used before new schools would be built. Boundary adjustments are used to ensure that existing capacity and the scheduled capital projects efficiently accommodate projected student enrollments.

While boundary plans are implied for new facilities proposed in this plan, formal approval of those plans will not occur until the year before they take effect. Changing circumstances may require different plans.

Executive Summary

Capital Planning and Growth Management

General Plan

The Capital Improvement Plan (CIP) must conform with an important County planning document, the Howard County General Plan. Known as *PlanHoward* 2030, it includes annual residential development targets through 2030. The HCPSS will work closely with the Howard County Government to identify future funding sources so that our capital plan best supports the growth management goals of the Howard County General Plan. The capital budget is presented to the Howard County Planning Board so they may make a finding of conformance with the General Plan to the County Council.

The General Plan policy most relevant to this capital budget is Policy 6.1h -- Schools, which directs HCPSS to make efficient use of existing school capacity avoiding unnecessary capital outlays. Including the most recent Board approval on November 21, 2019, HCPSS has conducted five years of boundary adjustments since the adoption of *PlanHoward 2030* to open new schools and make more efficient use of existing schools. Approximately 11,100 students were reassigned. Nearly 90 percent of these students were relocated to existing schools.

The General Plan also guides land development in accordance with relevant state growth management laws like the 1997 Priority Funding Areas Act and Smart Green and Growing Act which direct state spending to existing communities and places where local governments want state investment to support future growth, rather than farmland or undeveloped land. The HCPSS has invested heavily in priority funding areas with the construction of Ducketts Lane Elementary School, Thomas Viaduct Middle School and Hanover Hills Elementary School. Projects proposed outside of the priority funding area are systemic renovations necessary to maintain systems in existing schools, like boiler or HVAC upgrades.

Adequate Public Facilities Ordinance

The Adequate Public Facilities Ordinance (APFO) ties future residential construction in Howard County to projected school enrollments and school capacities. An update to the APFO was adopted by the County Council on February 5, 2018. Attendance areas that show a projected capacity utilization over 105 percent of an elementary school or region, 110 percent of a middle school or 115 percent of a high school program capacity are closed to future residential development until an attendance area adjustment or a capital improvement can be completed. The APFO test for opening or closing a school attendance area to new residential building looks at the projected population of a school three years out from the current year.

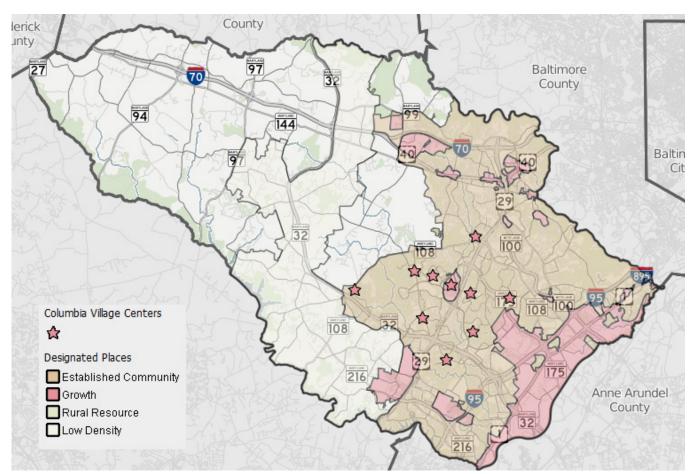

Capital Planning and Growth Management

The School Capacity charts that appear in the Supporting Data section are the charts that were approved for submission to the Howard County Council by the Board of Education on May 21, 2019, and subsequently submitted to the County Council and begin with the year 2022. The School Capacity charts do not include new schools or projects when their sites have not yet been acquired. As the school system secures deeds for the sites to these planned schools or projects, they will be reflected in that year's School Capacity chart.

Along with the elementary, middle and high school tests, a regional test within planning regions at the elementary level is also included in the ordinance. Using the School Capacity charts as indicators at the elementary level, one region is "closed" in 2022 and eighteen (plus one for based on the region test) schools are "closed" in 2022. At the middle school

level, six schools are "closed" in 2022. At the high school level, six schools are "closed" in 2022.

With the pre-/post-measures approach, the APFO formatted charts found in the Supporting Data section are in the pre-measures format. These charts represent the FY 2020 Capital Budget projects and the new projections. The post-measures charts represent the recommended capital projects for the FY 2021 Capital Budget and no proposed boundary adjustments and are for demonstrative purposes only.

The General Plan process was followed by adoption of the growth tiers map. Future development and school needs are planned in growth areas or village centers.

Enrollment Projections and School Capacities

Methodologies

The formulation of the FY 2021 Capital Budget, FY 2022–2026 Capital Improvement Program, and the FY 2021–2030 Long-Range Master Plan begins with the annual completion of enrollment projections, which were first published in the 2019 Feasibility Study. The projections included in this document are the result of a collaborative effort between the HCPSS, Howard County Department of Planning and Zoning, Maryland Department of Health and Mental Hygiene, and other county and state agencies.

The calculation of the future enrollment projection is based upon a "cohort survival ratio" method of projecting student enrollments. This methodology looks at past population patterns within the county to construct "survival ratios" in predicting a particular grade's migration through the school system. For example, cohort-survival ratios predict how many second graders will result from last year's first graders, how many third graders will result from last year's second graders, and continues until the number of twelfth graders from last year's eleventh graders is predicted. A geographical cohort survival ratio is used rather than a school-based cohort survival ratio to maintain comparability regardless of any boundary adjustments. Finally, the effects of new housing, the net effect of resale of existing housing, and programs housed at the school that impact enrollment are added to the cohort.

Capacities

Equitable evaluation of the impact of projected enrollment growth requires calculation of the capacities of schools. Capacities are not necessarily fixed to the capacity designed when a building first opened. Changes in use, programs, and standards can effectively change capacity.

High school capacities were evaluated and updated by the Board of Education in March 2009. High school program capacities are a product of either 80 or 85 percent of the total number of teaching stations multiplied by 25 students, exclusive of special education classrooms, and factored with consideration that not all teaching stations can be scheduled for use every period of the school day. Further, special-use teaching stations may not be adaptable for academic programs even if the space is available for a period of the school day.

Middle school capacities were evaluated and approved by the Board on September 26, 2013, after a full study and report by Gilbert Architects Inc. Middle school program capacities are a product of 95 percent of the total number of teaching stations multiplied by 20.5 students, exclusive of special education classrooms. Like high schools, not all teaching stations can be scheduled for use every period of the school day.

Elementary school capacities were evaluated and approved by the Board on October 23, 2014, after a full study and report by Gilbert Architects Inc. Elementary school program capacities are based on 22 students for each Kindergarten classroom, 19 students for each classroom in Grades 1 and 2, and 25 students for each classroom in Grades 3–5. Not included in the capacities for elementary schools are resource/instructional spaces that are utilized on a schoolwide basis where no one group of students is assigned exclusively. Some examples of spaces not included in the capacity are gymnasiums or multipurpose rooms, cafetoriums, art rooms, music rooms, media centers, gifted and talented rooms, or rooms dedicated to regional programs such as prekindergarten.

Executive Summary

Types of Capital Projects

The Capital Improvement Plan (CIP) provides for all facilities needs for the school system. Projects are identified by their purpose as described below.

Capacity Projects

New facilities or additions are proposed when projected enrollments cannot be accommodated reasonably within available capacity. The decision to construct a new facility or build an addition on an existing school involves consideration of fiscal implications as well as consideration of the following:

- Growth and location of the population to be served.
- Available capacity in surrounding schools.
- Accommodating needs of current and desired educational programs.

Each capacity project in the CIP has first been evaluated in the annual feasibility study, which balances school boundary adjustments with capital investments. If the attendance areas for existing schools can be adjusted, capital expenditures can be avoided or at least delayed. The Board of Education will review the CIP and set direction as appropriate during capital budget presentations each year. The opening of new schools requires changes in boundaries. Attendance area adjustments are not annual but potential options are evaluated annually in the feasibility study.

From the receipt of planning funds until completion of a project, it typically requires a maximum of three years to plan and construct an elementary or middle school and four years for a high school. Some parts of the construction process can be expedited at cost.

Non-Capacity Projects

Capital projects, which don't produce capacity are "systemic" and serve the long-term plans of HCPSS and the state of Maryland by keeping and maintaining the systems that support 30–40 year infrastructure investments. Most maintenance investments are covered by the operating budget and documented in the annual Comprehensive Maintenance Plan published as a requirement of the Maryland State Department of Education (MSDE). Each year staff evaluates the comprehensive maintenance plan to identify projects that exceed regular maintenance and add these projects to the capital improvement program as appropriate.

Renovations of existing schools are proposed when repairs of the structure's internal systems are no longer economically feasible. As the Comprehensive Facility Master Plan is updated using the results of ongoing facility assessments, specific projects are identified in the long-range master plan.

Types of Capital Projects

The decision to renovate an existing school involves the following considerations:

- Prioritization of needs based upon the current facility assessment.
- Optimal sequencing to ensure eligibility for state funding.
- Existing electrical, HVAC, roofing, and/or other major mechanical systems needs.
- Educational space needs.
- Health and safety needs.
- Americans with Disability Act (ADA) needs.
- Need to provide improved spaces for general teaching areas and/or supporting areas.

When renovating an older school, there are multiple considerations of how to best balance the existing footprint of the building against requirements defined in newer versions of the educational specifications. Renovation guidelines have been developed to provide a set of standards, guidelines, and procedures for use by HCPSS administrative staff and architectural/engineering firms engaged in the planning and design of renovation work for the school system.

Roofing Projects

A well-planned roofing program is critical to all other systems in a capital facility. When roofing systems wear, the damage from a failure can impact other systems and multiply costs. HCPSS regularly inspects roofing systems and provides reports to the state of Maryland. Planning and project execution must balance system warranties, state funding eligibility, and the risk of maintenance deferral.

Playground Equipment

Elementary school students are stimulated by interesting and engaging playground installations. The playground planning process considers the needs of a wide-range of ages and skills to develop strength, social skills, coordination, balance, and motor planning. Each year various playgrounds are replaced, repaired, or upgraded based upon need.

Types of Capital Projects

Relocatable Classrooms

Relocatable classrooms are pre-fabricated, standalone buildings which provide temporary capacity to a school to relieve overcapacity, provide temporary swing space during renovations/ additions, or provide space for a school's program needs. Currently there are 221 modular/relocatable classrooms for Grades K–12 being used by the HCPSS, including several larger modular units of at least five classrooms.

In some cases modular units are integrated into a building's core facility, such as at St. John's Lane Elementary School and Clarksville Middle School. These units are included in building capacity as they are considered permanent additions.

In recent renovations, modular units have been replaced, like Bollman Bridge Elementary School, Deep Run Elementary School, Waverly Elementary School and Patuxent Valley Middle School. The school system conducts reviews of the physical condition and usage of all relocatable/modular units. When units are inspected, the cost of repairs is weighed against the option of retiring the units.

Site Acquisition and Construction Reserve

The selection and acquisition of appropriate school sites figures prominently in the development of a capital program. Each proposed school site is carefully evaluated prior to acquisition according to Board-approved selection criteria identified in Policy 6000 Site Selection and Acquisition. Delays in acquisition of suitable school sites may affect the timing of construction of needed schools, resulting in overcrowding situations.

The HCPSS continues to maintain a "land bank" to purchase potential sites or portions of land to augment sites. Larger sites identified in the subdivision review process may be reserved to be budgeted as line items in future capital budgets. This fund is also used as a reserve for unanticipated construction costs.

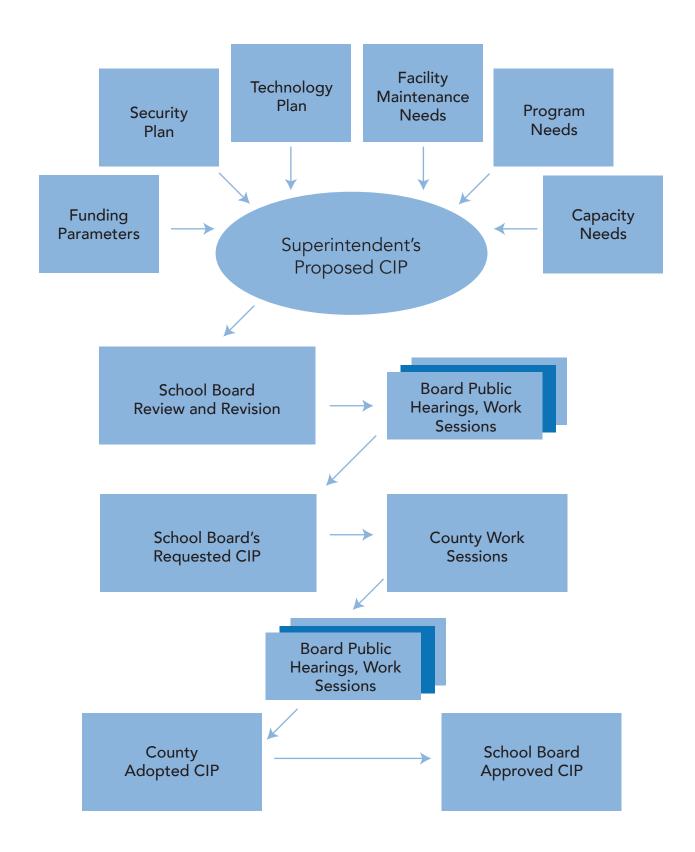

Land Bank as of December 1, 2019

The Board maintains ownership and/or the rights to purchase parcels of land for future school sites, commonly known as the "Land Bank." The following schedules detail the current land in the Land Bank.

Owned Sites	Acreage	Location	Date Acquired		Cost
Sunny Spring Drive (aka Hawthorne Park)	10	Sunny Spring Drive, be- tween Cricket Pass and Golden Hook	1974	\$	1

Calendar for Development and Review/Approval

Board's Proposed FY 2021 Capital Budget Capital Improvement Program FY 2022–2026 Long-Range Master Plan FY 2021–2030

Thursday, June 13, 2019 7:30pm - Board Room	Staff presentation of Feasibility Study Report including 2018 enrollment projections.
Tuesday, August 20, 2019 7:00pm - Board Room	Board of Education Public Hearing and Pre-Development Work Session.
Tuesday, September 10, 2019 7:00pm - Board Room	Staff presentation of the Superintendent's Proposed Capital Budget.
Thursday, September 19, 2019 7:00pm - Board Room	Board of Education Public Hearing on Superintendent's Proposed Capital Budget. Work Session and Approval of Superintendent's Proposed Capital Budget following the Public Hearing.
Thursday, October 3, 2019 7:00pm	Planning Board Public Hearing on Board of Education's Proposed Capital Budget.
Thursday, October 4, 2019	Board of Education submission of Proposed Capital Budget to Maryland Public School Construction Program.
Monday, November 4, 2019 7:00pm	County Council approval of Board of Education's Proposed Capital Budget for letter of support to the Interagency Committee on School Construction.
Tuesday, December 17, 2019 4:00pm	Board of Education Capital Improvement Program Follow-up Discussion on Direction of Priority Projects
Tuesday, February 13, 2020 3:00pm - Board Room	Board of Education Adoption of the Requested Capital Budget.
Mid-March	Board of Education submission of the Requested Capital Budget to the County Executive and Budget Administrator.
TBD	County Executive Public Hearing on Capital Budget.
TBD	County Executive presentation of the Capital Budget.
Thursday, April 30, 2020 7:00pm - Board Room	Board of Education Public Hearing.
TBD	County Council Public Hearing on the Education portion of the County Executive's Capital Budget.
Tuesday, May 7, 2020 4:00pm - Board Room	Board of Education Work Session (if necessary).
TBD	Staff pre-file of the Adequate Public Facilities Ordinance Open/Closed Chart to County Council.
TBD	County Council Adoption of the Capital Budget.
Thursday, May 28, 2020 3:00pm - Board Room	Board of Education Adoption of the Capital Budget
TBD	County Council Adoption of Adequate Public Facilities Ordinance Open/ Closed Chart.

Section 2

System Information

HCPSS Facilities at a Glance

The HCPSS maintains well over seven million square feet of school facilities and other buildings in service of delivering the educational program and for use by the community. The school system owns or controls approximately 1,820 acres of land. Approximately seven percent of HCPSS staff are devoted in some way to the maintenance of facilities.

HCPSS Facilities

77 Schools

- 42 Elementary Schools
- 20 Middle Schools
- 12 High Schools
- 3 Special Schools

Ancillary Facilities

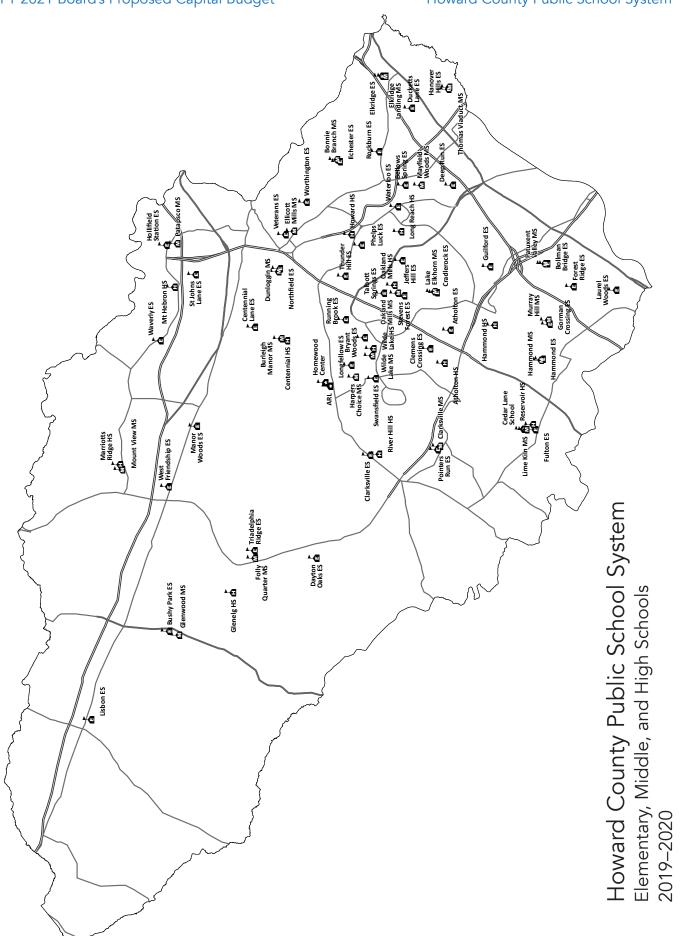

Ascend One

- Berger Road Building (Shared Space) Central Office
- Faulkner Ridge (Vacant) Gerwig Road Building (Warehouse)
- Mendenhall Court (Leased Offices and Shops)
- Ridge Road Center (Shops)
- Old Bushy Park (Storage)
- Old Cedar Lane (Offices)

Average Age of Facilities				
Elementary	Middle	High		
37 years	31 years	39 years		

Enrollment*	
Total Enrollment (Pre-K–12)	57,907
Elementary (Pre-K–5)	26,650
Middle (6–8)	13,427
High (9–12)	17,724
Special Schools	106

* Official September 30, 2018 Enrollment Report.

Section 3

Project Detail

Talbott Springs Elementary School Replacement: Project 1043

9550 Basket Ring Road, Columbia, MD 21045 http://tses.hcpss.org/

Nancy	Thompson,	Principal
-	. 410	0.313.6915

Building Data		
Year Built	1973	
Age	46	
Site Area (acres)	10	
Last Renovation/Addition	2008	
Current Relocatables	10	
Current Capacity	377	
9/2018 Enrollment	471	
Projections/Capacity Utilization		
2019 Projection	465	
Projected Utilization	123%	
2022 Projection	426	
Projected Utilization	113%	
Post-Project Cap.	540	
Projected Utilization	79%	

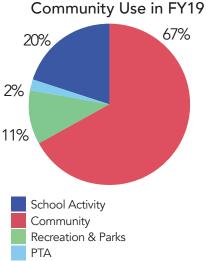

Project Purpose

The Talbott Springs Elementary School project will replace an aging elementary school with a modern facility. Talbott Springs Elementary School opened in 1973 and was renovated in 2000. The art room and gymnasium were expanded in 2000 and all day kindergarten was added in 2008. In April 2009, HCPSS engaged Gilbert Architects Inc. to conduct a facility assessment of elementary schools. The report concluded that Talbott Springs Elementary School had an 18.7 percent deficiency of educational program space. In the FY 2021 Capital Budget, the total project cost estimated is \$43.5 million. Talbott Springs Elementary School is expected to achieve USGBC LEED Silver Certification. The complete scope of this project will be defined by the Board of Education approved construction

documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

Community Use at Talbott Springs ES

Talbott Springs Elementary School hosted an estimated 50,600 11% attendees for more than 1,200 reservations after school hours and on weekends for a variety of events. The majority of the events were after school activities and community events and remaining reservations were athletic and PTA events.

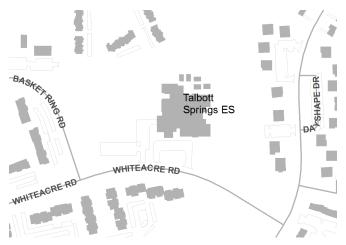

Project Details

The planned scope of work includes a replacement facility to provide students with a new modern energy efficient building with programmatic and physical upgrades as well as new mechanical, electrical and technology systems in compliance with the HCPSS General Educational Specifications for New Elementary Schools. This project calls for an expansion of the educational program spaces, including additional programmatic space needed for Title I services.

School Location Map

This project received \$17.6 million (including the TAO) in funds in FY 2018 through FY 2020. Construction funds are to be requested in FY 2021 through FY 2022 to complete work and have the school ready by September 2022.

Details of the budget request for this project can be found on the Capital Budget Request pages in Section 1 (Executive Summary) and the Project Cost Details pages in Section 3 (Project Detail).

Project Timeline

The above chart shows the calendar year timeline for planning and construction for this project (in months). The Talbott Springs ES project is scheduled for completion in September of 2022.

New HS #13: Project 1035

Mission Road, Jessup MD

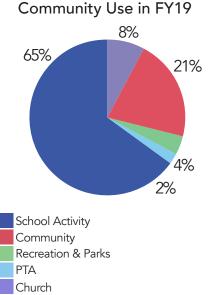

Architect rendering of Marriotts Ridge High School courtesy of TCA Architects.

Project Purpose

New HS #13 will be a new facility. Based upon enrollment projections, at least one additional high school is needed to accommodate growth. Balanced capacity utilization in the northeast region alone would require 1,300 additional seats by 2023. The FY 2020 Capital Budget recommends completion of New HS #13 in 2023. Planning was initiated in FY 2019. The complete scope of this project will be defined by the Board of Education approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

Community Use at New HS #13

Community use is anticipated in the planning for this new facility. As a comparison, Wilde Lake High School hosted an estimated 1,300,000 attendees for over 7,500 reservations after school hours and on weekends for a variety of events. The majority of the events were community and school related and athletic events, and the remaining reservations were Recreation and Parks, church events, and PTA meetings.

New HS #13 received \$15.7M million in FY 2019 and FY 2020. Based upon this timeline, the Board will request construction funding for this project in FY 2021 through FY 2024 to complete work and have the school ready for occupancy by September 2023. Details of the budget request for this project can be found on the Capital Budget Request pages in Section 1 (Executive Summary) and the Project Cost Details pages in Section 3 (Project Detail).

Project Timeline

The above chart shows the calendar year timeline for planning and construction for this project (in months). The New HS #13 project is scheduled for completion in September of 2023.

Hammond High School Renovation/Addition: Project 1024

8800 Guilford Road, Columbia, MD 21046 http://hahs.hcpss.org/

John DiPaula, Principal
410.313.7615

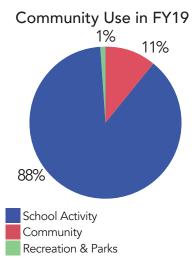

Building Data			
Year Built	1976		
Age	43		
Site Area (acres)	33.14		
Last Renovation/Addition	2011		
Current Relocatables	4		
Current Capacity	1,220		
9/2018 Enrollment	1,378		
Projections/Capacity Utilization			
2019 Projection	1,380		
Projected Utilization	113%		
2023 Projection	1,576		
Projected Utilization	129%		
Post-Project Cap.	1,440		
Projected Utilization	111%		

Project Purpose

The Hammond High School project will renovate and expand the existing school. Hammond High School is a one-story building that first opened in 1976 and underwent some renovation and addition work in 1996, followed by a dance studio addition in 2011. The present need is a complete renovation of the school with systemic upgrades to bring it into compliance with the Howard County Public School Systems Guidelines Manual for Renovations and Modernizations of Existing Schools. An addition of 200 seats of new capacity is planned for this project. The complete scope of this project is defined by the Board of Education approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

Community Use at Hammond High School

An attendance of 357,000 was estimated for over 5,300 reservations at Hammond High School for events outside of school hours. Most after school activities at any high school are school-related including after school programming, athletic activities, educational activities and performing arts.

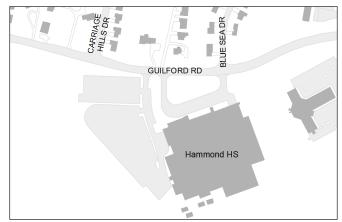

Project Details

The project will consist of a complete systemic renovation and addition to the school that will replace the aging heating and cooling systems, upgrade the plumbing and electrical systems, supply new data technology and security systems, provide new interior finishes throughout the building, create ADA accessibility compliance throughout, repartition select areas of the school, and construct building additions as necessary to fulfill program deficiencies. It is also the intent to concentrate on energy efficient systems.

School Location Map

The first year of funding for Hammond High School was in FY 2019. Based upon the current plan, the Board will request construction funding for this program in FY 2021 through FY 2024 totaling \$115.4 million to complete work and have the school ready by September 2023.

Details of the budget request for this project can be found on the Capital Budget Request pages in Section 1 (Executive Summary) and the Project Cost Details pages in Section 3 (Project Detail).

Project Timeline

The above chart shows the calendar year timeline for planning and construction for this project (in months). The Hammond High School Addition/Renovation project is scheduled for opening in September of 2023.

Dunloggin Middle School Renovation/Addition: Project 1049

9129 Northfield Road Ellicott City, MD 21042 http://dms.hcpss.org/

Project Purpose

The Dunloggin Middle School project will expand educational program spaces with 97 seats of new capacity and renovate the existing facility. Dunloggin Middle School opened in 1973 and

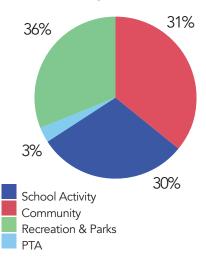

was renovated in 1999. In August 2008, HCPSS engaged Gilbert Architects, Inc. to conduct a facility assessment of middle schools. The report concluded that Dunloggin Middle School has a 13.8 percent deficiency of educational program spaces. In the FY 2021 Capital Budget, the total project cost estimate is \$46.3 million. USGBC LEED Certification will be considered in the planning of this project. The complete scope of this project will be defined by the Board of Education approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

Community Use at Dunloggin Middle School

Over 2,700 reservations brought community members and students into Dunloggin Middle School after school hours and on weekends for a variety of community and student programs, meetings, activities, and events. An attendance of nearly 200,000 was estimated for these activities. Community activities accounted for the largest portion of the facility use. Other uses, which include school activities, PTA events and Recreation and Parks programs, make up the remaining reservations. Antionette Roberson, Principal 410.313.2839

Building Data			
Year Built	1973		
Age	46		
Site Area (acres)	20		
Last Renovation/Addition	1999		
Current Relocatables	5		
Current Capacity	565		
9/2018 Enrollment	661		
Projections/Capacity Utilization			
2019 Projection	657		
Projected Utilization	116%		
2024 Projection	676		
Projected Utilization	120%		
Post-Project Cap.	662		
Projected Utilization	102%		

Community Use in FY19

Project Details

This project calls for an expansion of the educational program spaces and renovation of the existing facility. The renovation will include a complete systemic renovation of the existing building including new electrical, mechanical, plumbing, technology, roofing and life safety systems. The project will provide 97 seats of additional classroom space and core infrastructure space necessary to operate effectively at the larger capacity. Interior spaces will be reconfigured, new finishes provided, accessibility improve, and new spaces added as required bringing the facility into compliance with renovation specifications.

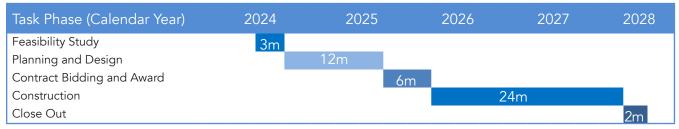

School Location Map

The first year of funding for Dunloggin Middle School is scheduled for FY 2025. In previous budgets it was listed as a systemic renovation. The requested funding in FY 2025 will allow planning and design to begin. Construction will start in FY 2025. Based upon the current plan, the Board will request a final funding in FY 2029 to complete work for the school to open in September 2028.

Details of the budget request for this project can be found on the Capital Budget Request pages in Section 1 (Executive Summary) and the Project Cost Details pages in Section 3 (Project Detail).

Project Timeline

The above chart shows the calendar year timeline for planning and construction for this project (in months). The Dunloggin Middle School Renovation/Addition project is scheduled for completion in September of 2028.

Oakland Mills Middle School Renovation/Addition: Project 1036

9540 Kilimanjaro Road, Columbia, MD 21045 http://omms.hcpss.org/

Allen Cosentino, Principal
410.313.6937

Building Data			
Year Built	1972		
Age	47		
Site Area (acres)	20		
Last Renovation/Addition	1998		
Current Relocatables	0		
Current Capacity	506		
9/2018 Enrollment	519		
Projections/Capacity Utilization			
2019 Projection	513		
Projected Utilization	101%		
2026 Projection	510		
Projected Utilization	101%		
Post-Project Capacity	662		
Projected Utilization	77%		

Project Purpose

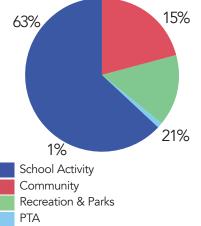

The Oakland Mills Middle School project will renovate and add seats to the existing facility. Oakland Mills Middle School opened in 1972 and was renovated in 1998. In August 2008, HCPSS engaged Gilbert Architects Inc. to conduct a facility assessment of middle schools. This project evaluated and scored each school according to the Council of Educational Facilities Planners, International (CEFPI) appraisal guidelines. The assessment included reviewing each school's plan layouts and measurements of spaces to compare to the educational specifications developed by HCPSS for middle schools. The report concluded that Oakland Mills Middle School had 8.8 percent deficiency of educational program space. In the FY 2016 Capital Budget the cost for the limited renovation was estimated at \$16.3 million. In the FY 2021 Capital Budget the complete renovation and addition cost estimate is \$51.5 million. The complete scope of this project will be defined by the Board of Education approved construction

documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

Community Use at Oakland Mills Middle School

Community members and students spent nearly 6,000 hours at Oakland Mills Middle School after school hours and on weekends for a variety of community and student programs, meetings, activities, and events. An attendance of 138,000 was estimated for these activities. After school activities accounted for much of the facility use. Athletic activities and child care are included in the remaining reservations.

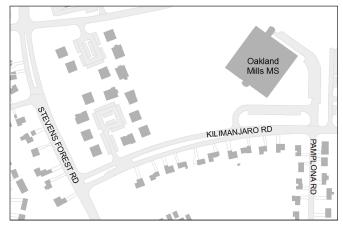

Project Details

The project calls for a renovation of the existing building in accordance with recommendations from the feasibility study as well as the addition of 156 seats. Renovation will include new electrical, mechanical, plumbing, technology, roofing, and life safety systems as applicable per the scope of work. Some Interior spaces will be reconfigured, new finishes provided, accessibility improved, and new spaces added as required, bringing the facility into compliance with the HCPSS Guidance Manual for Renovations and Modernizations of Existing Schools.

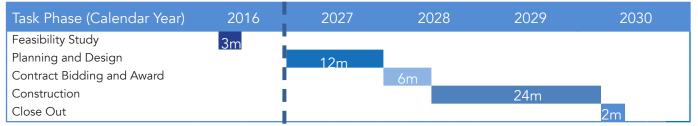

School Location Map

Planning and construction funds will be requested in FY 2028 through FY 2031. This funding schedule will allow construction to progress on schedule and work to be completed by September 2030.

Details of the budget request for this project can be found on the Capital Budget Request pages in Section 1 (Executive Summary) and the Project Cost Details pages in Section 3 (Project Detail).

Project Timeline

The above chart shows the calendar year timeline for planning and construction for this project (in months). The Oakland Mills Middle School Renovation project is scheduled for completion in September of 2030.

Long-Range Plan Adjustments: New Schools (Grades K-12)

Sites to be determined.

Responding to the 2019 Feasibility Study

Planning and zoning changes require adjustments to the CIP. While the HCPSS is peripheral to land development discussions, land planning decisions impact school system capital improvement plans. Staff continues to work closely with the Departments of Planning and Zoning and Public Works to ensure that schools are central to new development. The annual feasibility study analyzes these trends and proposes adjustments to the CIP.

The projections indicate that the FY 2021–2030 long-range plan requires three new elementary schools. ES #43, ES #44 and ES #45 were introduced in previous capital budget requests. New HS #14 replaced the New MS/HS Career Development Center that was introduced in the Superintendent's Proposed FY 2019 Capital Budget. Both New ES #45 and New HS #14 were removed from the Long Range Master Plan due to fiscal constraints.

Elementary School Needs

Elementary enrollment is projected to increase by nearly 3,600 students by 2028 and the capacity utilization of all elementary schools combined will begin to exceed 110 percent by 2028. This suggests more elementary capacity is needed in the long-range capital improvement plan. The three areas which will experience the greatest growth over the next five to ten years will be the Route 1 Corridor, Columbia Town Center, and Turf Valley.

ES #43 – Southeastern ES – 1039

The continued growth along the Route 1 Corridor continues to support the need for additional seats between the Northeastern and Southeastern regions. The needs of the southeast region are evident in the projections of Bollman Bridge Elementary School, Gorman Crossing Elementary School, Forest Ridge Elementary School and Fulton Elementary School. The location of ES #43 is on Mission Road.

Artist rendering of the redevelopment of the Columbia Town Center. The Columbia Town Center report anticipated future needs as a result of this project.

ES #44 – Turf Valley ES – 1040

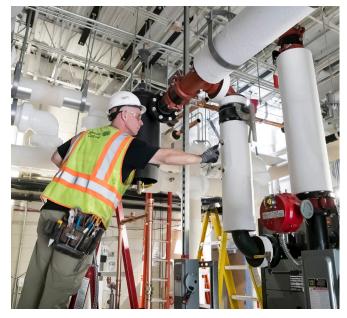

Projections continue to support the need for elementary boundary adjustments to relieve crowding at Manor Woods Elementary School associated with Turf Valley growth. The addition at Waverly Elementary School will absorb some growth. Considering the limited potential for expanding schools outside of the sewer service area, a Turf Valley school is planned. The Howard County Executive's Office is currently assisting HCPSS in securing land for the land bank.

High School Needs

High enrollment is projected to increase by nearly 2,500 students by 2028 and the capacity utilization of all high schools combined will begin to exceed 110 percent by 2022. This suggests additional high capacity is needed in the long-range capital improvement plan. New HS #13 is scheduled to open in SY 2023-24. Based on continued growth throughout the long-range projections at the high school level, staff will continue to monitor the projection trends and look for school sites to plan for future high school additions or new schools.

Details of the budget requests for these projects can be found on the Capital Budget Request pages in Section 1 (Executive Summary) and the Project Cost Details pages in Section 3 (Project Detail).

Systemic Renovations: Project 1044

Systemic Renovations Actual Expenses			
Fiscal Year	Actual Expense		
FY 2015	\$	11,565,498	
FY 2016	\$	10,920,834	
FY 2017	\$	7,872,598	
FY 2018	\$	5,543,132	
FY 2019	\$	11,777,007	

School Facilities is charged with maintaining the facilities of the Howard County Public School System (HCPSS) in as near original condition and effectiveness as possible. Actual costs incurred in the Systemic Renovations Project over the past five years is above.

HVAC cessible to other novation poplete oard of nts (CD) ng Data porcess) puent to H3,073,000 H1,732,039)

Project Purpose

The Systemic Renovations project includes projects that are needed to bring older facilities up to current standards in lighting, electrical, HVAC systems, reconfiguring space, handicap accessible improvements, and provide for upgrades to other building systems. For larger systemic renovation projects (see project details section), the complete scope of projects are defined by the Board of Education approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

FY 2021 Request Analysis

Project Funding (July 1, 2019 - June 30, 2020)	\$ 43,073,000
Project Cost-to-Date (through June 30, 2019)	(1,340,961)
FY 2020 Projected Costs/Encumbrances	(41,732,039)
Available Project Funding (July 1, 2020)	\$ -
Requested Budget FY 2021	\$ 39,900,000

Howard County Public School System

Project Details

projects Systemic renovation include improvements and installation of systems at various school sites, including projects of a critical nature such as sprinkler repair, HVAC repair, and window replacement. The Department of School Facilities publishes an annual Comprehensive Maintenance Plan which reflects the objectives and methods utilized to provide a safe and secure learning environment for Howard County's school community as required by the Public School Construction Program's Administrative Procedures Guide. This document has been consulted in the development of this budget for potential systemic projects.

The FY 2021 Capital Budget request represents renovation work or planning for future construction at the following school system facilities:

Modification of FY 2020 HVAC Project Scopes Applications Research Lab Maintenance Elkridge Landing MS HVAC Replacement Hammond MS Boiler Replacement

Indoor Environmental Quality Project Repairs

Staff have implemented measures to reduce negative environmental impacts on schools over the last two years with this important funding source. Projects include maintenance of building envelopes, resolution of foundation issues, fixing settlement cracks, managing humidity related conditions and remediating flood damages.

Special Education/Regional Program Needs

The placement of new or the relocation of existing Special Education and regional programs is based on student needs and school capacity. Each program requires specific space configuration and education specifications.

School Safety and Security Measures

School safety and security enhancement projects are currently ongoing to comply with the Maryland Safe to Learn Act. As additional critical infrastructure projects are identified during annual compliance assessments, they too will be scheduled and completed.

Emergency Reserve

The emergency reserve funding assists with projects that are not eligible for capital project consideration, those that have exceeded their operational life, premature failures and unexpected weather related damages.

Local Match for State Initiatives

In addition to County funding, State funding is critical to support the school system's capital funding needs. HCPSS is working to identify additional systemic projects that may be eligible for available State funding opportunities and/or initiatives. Since State funding is provided as reimbursement of eligible costs, it is essential for County funding to be in place prior to State application to ensure funding is available to plan and design projects as well a fund the County match, if required. Since State funding is never guaranteed, County funding levels should be in place to support completion of projects. This is an important step in striving to reduce deferred maintenance.

Roofing Projects: Project 1046

Project Purpose

Roofing Projects addresses aging roofs on various Howard County Public School System schools. A well-planned roofing program is critical to all other facility systems. When roofing systems wear, the damage can impact other building systems increasing repair costs exponentially. Roof planning is more than shingles and asphalt. Modern roofing systems are complex investments built to exact specifications and code requirements. The HCPSS inspects each facilities' roof twice a year and provides the reports to the State of Maryland. Planning and project execution must balance system warranties, state funding eligibility, and the risk of maintenance deferral.

Roofing Projects Actual Expenses				
Fiscal Year	Actual Expense			
FY 2015	\$	3,400,190		
FY 2016	\$	2,220,940		
FY 2017	\$	4,830,760		
FY 2018	\$	1,800,046		
FY 2019	\$	812,030		

School Facilities oversees the Roofing Projects and provides maintenance and repairs for all HCPSS facilities. Actual costs incurred in Roofing Projects over the past five years is indicated in the chart above.

FY 2021 Request Analysis		
Project Funding (July 1, 2019 - June 30, 2020)	\$	16,997,000
Project Cost-to-Date (through June 30, 2019)		(13,160)
FY 2020 Projected Costs/Encumbrances		(16,983,840)
Available Project Funding (July 1, 2020)	\$	
Requested Budget FY 2021	\$	1,000,000

Roofing Projects

Project Details

The roof system is the largest area of the building that endures the most severe weather conditions. The roof protects the structural integrity of the building, equipment and its systems. Because of building age and environmental conditions, scheduled roof replacements must be completed to protect the investments that have been made in our facilities.

Roofing Projects include the design and construction of repairs to existing roof systems, the removal of old roof systems, and installation of a new roof system to include insulation membrane and flashings, sheet metal, drainage systems, and other associated components.

HCPSS is requesting funding for roof projects in FY 2021. In continued collaboration with the Office of School Construction, roofing Projects will be considered in conjunction with systemic renovations, when feasible.

The Facilities Department has and will continue to include the additional costs and impact related to the roof replacement projects, such as high ceiling cleaning of debris and fireproofing, budgeting for the 2015 IBC/IECC code for R-30 insulation, exterior sealants. Facilities will conservatively budget for these items but will have to revisit the schools to determine the final scope for budgeting purposes. These newer items will require additional thought regarding the roof budget and, more importantly, their impact on the project and schedule, which includes phasing.

Playground Equipment: Project 0990

Project Purpose

The Playground Equipment project will replace aging playgrounds at a variety of Howard County Public School System schools. This fund maintains a cycle of playground replacements. While playgrounds seem to be a standard installment at any elementary school, playgrounds can vary widely in design and are not specifically required by state or local codes or policies. Recess and unstructured play is a standard of Policy 9090 Health and Wellness. Research supports a link between learning and unstructured play. Elementary school students are stimulated by interesting and engaging playgrounds. The playground planning process considers the needs of a wide-range of ages and skills to develop strength, social skills, coordination, balance, and motor planning.

FY 2021 Request Analysis		
Project Funding (July 1, 2003 - June 30, 2020)	\$	2,930,000
Project Cost-to-Date (through June 30, 2019)		(2,902,799)
FY 2020 Projected Costs/Encumbrances		(27,201)
Available Project Funding (July 1, 2020)	\$	-
Requested Budget FY 2021	\$	250,000

Playgrounds Actual Expenses				
Fiscal Year	Actual Expense			
FY 2015	\$	503,412		
FY 2016	\$	85,058		
FY 2017	\$	-		
FY 2018	\$	160,118		
FY 2019	\$	421,112		

The Grounds Department oversees the Playground Equipment Project, managing safety requirements and a long-term replacement plan for all HCPSS playgrounds. Actual costs incurred in the Playground Equipment Project over the past five years is above. Without funding constraints, playground project expenses would be higher.

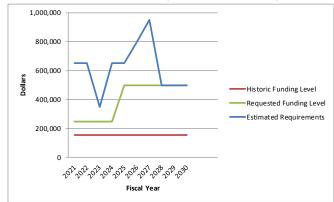

Howard County Public School System

Project Details

Playground replacement is planned every 15 years. In the interim, they are maintained and repaired using operating funds. This schedule delivers new designs and safety improvements in a reasonable period without requiring a much larger share of the capital budget. \$250,000 is adequate to replace both the kindergarten playground and grade 1-5 playground at an elementary school. In future years, more than two playground replacements are needed per year. Decisions about installing specific equipment are school based and require individual contracts. Better pricing may be possible through package bidding. Playground equipment at newly built schools is included in the funding request for the individual capital improvement project.

Projected Playground Replacement Cost per FY

Long-Term Plan	
Playground Site	Fiscal Year
Northfield Elementary School	FY 2021
Bryant Woods Elementary School	FY 2021

The chart seen to the left shows the estimated funding requirements based upon the long-term plan listed above. Advancing or delaying some projects may help to smooth the funding profile but the graph shows that present funding levels will not be sufficient with future requirements. Risk management and purchasing staff are exploring different bidding methods with standard design options, which may save on design costs.

Relocatable Classrooms: Project 1045

Project Purpose

The Relocatable Classrooms project provides funds for the relocation and repairs of existing relocatable classrooms or purchase of new portable classrooms to be placed at schools in need of additional capacity. Relocation includes moving the structures as well as the installation of support services that make the portable structures functional classrooms. Additional classroom spaces are needed to help relieve overcapacity schools until permanent classroom spaces are available.

FY 2021 Request Analysis

Project Funding (July 1, 2019 - June 30, 2020)	\$ 4,800,000
Project Cost-to-Date (through June 30, 2019)	(2,163,072)
FY 2020 Projected Costs/Encumbrances	(2,636,928)
Available Project Funding (July 1, 2020)	\$ -
Requested Budget FY 2021	\$ 1,700,000

Relocatable Classicollis Actual Expenses		
Fiscal Year	A	ctual Expense
FY 2015	\$	1,613,098
FY 2016	\$	1,322,547
FY 2017	\$	661,112
FY 2018	\$	1,888,241
FY 2019	\$	2,235,775

Polocatable Classrooms Actual Ev

The School Planning Office evaluates relocatable classroom needs annually in a report to the Board of Education. After a decision is made, School Construction oversees the placing and connecting of all HCPSS relocatables. Actual costs incurred in the Relocatable Classrooms project over the past five years is shown above.

Relocatable Classrooms

Project Details

In September 2019, there were 221 relocatable/ modular classrooms in use (four are used for administrative purposes at the Central Office, all others are at school sites).

In some cases modular units are integrated into a building's core facility. These units are in use at St. John's Lane Elementary School and Clarksville Middle School. These units are included in building capacity because they are considered permanent additions. In recent renovations at Bollman Bridge Elementary School, Deep Run Elementary School and Patuxent Valley Middle School, modular units were replaced.

The school system conducts regular reviews of the physical condition and usage of all relocatable/ modular units. When units are inspected, the cost of repairs is weighed against the option of retiring the units. Cycling out, and even reducing the inventory, can create operating economies. The potential to either take relocatables out-ofservice, transport them to other locations where needed, or place them in excess to dispose of in an appropriate manner will be decided annually. However, any dramatic reduction of inventory would require a considerable investment in brick and mortar construction.

Site Acquisition and Construction Reserve: Project 1047

Project Purpose

The Site Acquisition and Construction Reserve project is needed as a contingency reserve providing funds for use on an as-needed basis. Site funds are needed for future enrollment growth. This account is also a contingency fund for school construction at various school sites. The county government is currently negotiating the purchase of two future school sites that will be purchased directly by the county.

FY 2016	\$	3,704	
FY 2017	\$	607,123	
FY 2018	\$	1,103,937	
FY 2019	\$	333,998	

The School Construction Office oversees the Site Acquisition and Construction Reserve Project. Actual costs incurred in the Site Acquisition and Construction Reserve Project over the past five years is above. Funding has been limited in the last several years.

Project Details

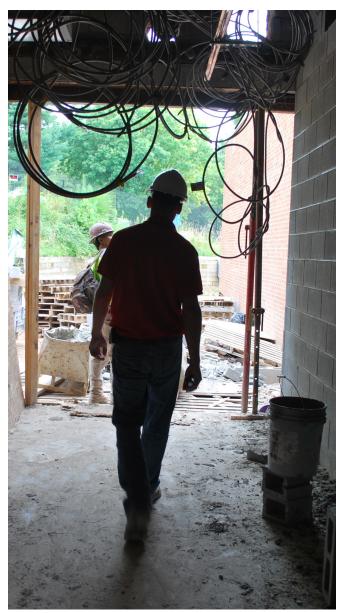

This fund is for site acquisition. The selection and acquisition of appropriate school sites is integral to the development of a capital program. Each proposed school site is carefully evaluated prior to acquisition according to Board-approved selection criteria identified in Policy 6000 Site Selection and Acquisition.

Delays in acquisition of suitable school sites affect the timing of construction of needed schools. This can result in extended periods of crowding. In an effort to reduce such delays, the HCPSS continues to maintain a "land bank" that will be called upon to pursue the purchase of potential sites or portions of land to augment sites.

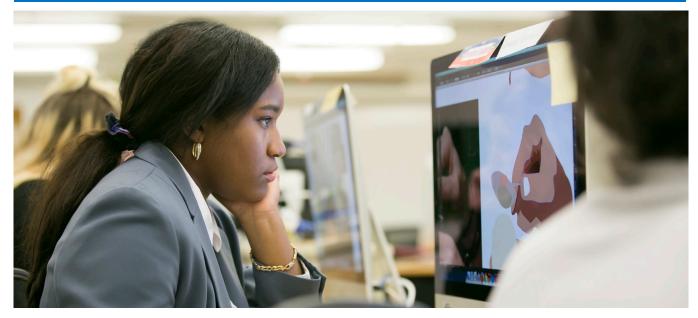

Larger sites identified in the subdivision review process may be reserved to be budgeted as line items in future capital budgets. The state of Maryland regulates but does not pay the costs for site acquisitions; therefore, funds for the purchase of school sites are provided locally by the Howard County Government.

This fund also serves as a construction reserve. Capital planning has been fairly accurate and overruns have been minimal so the actual use of the majority of this fund has been to acquire land. In the past, initial pre-planning expenses have been charged to this account, but the FY 2016 Capital Budget introduced pre-planning as a separate project request.

Requests for funding in the Capital Improvement Plan have been delayed due to fiscal restraints.

Technology: Project 1048

Project Purpose

Technology project funds are required for replacements and continuous improvements to HCPSS infrastructure, computer systems and applications to ensure that instruction and business needs are met in a secure, standard, and equitable manner. Key projects include the telecommunication system, cybersecurity, enterprise printing, and student devices

FY 2021 Request Analysis

Project Funding (July 1, 2019 - June 30, 2020)	\$ 3,750,000
Project Cost-to-Date (through June 30, 2019)	(548,984)
FY 2020 Projected Costs/Encumbrances	(3,201,016)
Available Project Funding (July 1, 2020)	\$ -
Requested Budget FY 2021	\$ 5,500,000

Technology Actual Expenses			
Fiscal Year	Actual Expense		
FY 2015	\$	5,226,710	
FY 2016	\$	5,559,784	
FY 2017	\$	458,965	
FY 2018	\$	6,109,668	
FY 2019	\$	2,464,456	

The Department of Information Technology oversees the Technology project, and supports and maintains all enterprise technology infrastructure, computer systems and applications. Actual costs incurred in the Technology project over the past five years are below.

Project Details

Telecommunication System

The HCPSS telecommunication system needs to be replaced with a unified systemwide telecommunication system that meets current technology and security standards and is reliable, accessible, and ensures the safety of students, teachers and staff. While HCPSS has deferred the replacement of the phone system several times due to lack of funding, the project can no longer be delayed. Verizon has sent HCPSS notification of the pending termination of Centric ("copper") service for the past four years. This year HCPSS received official notification from Verizon that 30

phone lines will be terminated in March 2020, including some main school and central office phone numbers. Verizon likely then will suspend an additional set of numbers in the months that follow.

Cybersecurity

HCPSS has deferred upgrades to technology security operations and systems for several years due to budget constraints. With the increase of cyberattacks and ransomware targeting school systems and government agencies, HCPSS needs to improve its technology security posture. Many important cybersecurity initiatives will be implemented to mitigate risks to our students, staff, parents, and community members. These projects will enhance HCPSS' ability to prevent, identify, respond to, and recover from cyberattacks.

Enterprise printing

Staff rely on printing to deliver instructional resources and information to students, parents and community members. Many printers in the school system are at the end of their usable life, which has increased operating costs and negatively impacted productivity of teachers. This project will implement an integrated enterprise print solution that is cost-effective, flexible, and able to meet long-term needs of the school system.

Student Devices

The majority of instructional computers across the district are approaching the end of their usable life. These computers are frequently broken, needing parts and functionally running slowly, resulting in a loss of instructional time and limiting student access to technology. Student devices are essential for providing equitable instructional opportunities that support teachers as they provide students opportunities to master technology literacy standards and gain college and career ready skills and knowledge.

Enterprise Infrastructure

Enterprise Infrastructure refers to the entire collection of computers, audio visual equipment, networks, Wi-Fi equipment, servers, switches, supporting software and other related hardware equipment in schools and offices. These items, along with supporting services such as installation, monitoring, maintenance, and repairs, provide the backbone for a high performing learning community. Infrastructure hardware is a significant portion of any technology budget and must be refreshed on a cyclical basis.

Enterprise Applications

Enterprise Applications provide the system-wide information for the operation and benefit of our program directors, administrators, teachers, students, and parents. Enterprise Applications governs the operations of each of the major data systems: Student Information System (Synergy), Data Warehouse (Hoonuit), Learning Management System (Canvas), and our cloud-based Financial Management, Budgeting, and Human Capital Management System (Workday).

School Parking Lot Expansions: Project 1012

Parking Lot Expansion Actual Expenses		
Fiscal Year	Ac	tual Expense
FY 2015	\$	-
FY 2016	\$	-
FY 2017	\$	-
FY 2018	\$	92,000
FY 2019	\$	160,427

School Facilities oversees the School Parking Lot Expansions Project. Actual costs incurred in the School Parking Lot Expansions Project over the past five years is shown above. Due to funding constraints, requests for this project have been deferred until future years.

Project Purpose

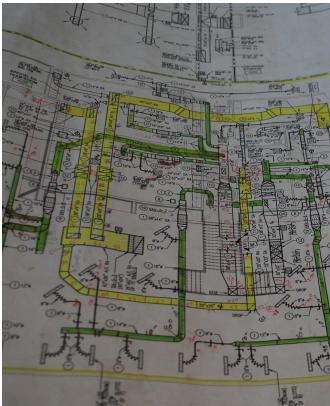

School Parking Lot Expansion projects provide for the construction of additional parking spaces and modification of parking lots to improve traffic flow patterns at existing school sites. These projects are necessary due to the insufficient supply of spaces to meet existing needs. Funds are used for parking improvements on sites that are not scheduled for other construction projects.

FY 2021 Request Analysis		
Project Funding (July 1, 2003 - June 30, 2020)	\$	4,200,370
Project Cost-to-Date (through June 30, 2019)		(3,833,191)
FY 2020 Projected Costs/Encumbrances		(367,179)
Available Project Funding (July 1, 2020)	\$	-
Requested Budget FY 2021	\$	-

Planning and Design: Project 1038

Project Purpose

The Planning and Design project has been established to provide funding for scope studies prior to the funding of individual projects. During the concept development stage, each project is summarized, supporting documentation is gathered, and necessary approvals are obtained before construction begins. A scope study provides the analysis to determine the scope and breadth of a project under consideration.

The value of these studies is having the flexibility to ask technical questions about projects before the formal design process. With these studies, projects can be "right sized." Pricing for these studies is favorable because design consultants want to obtain the full design project. These studies ensure the selection of the most effective scope for each project. This process will reduce the costs associated with significant changes in scope, which often occur in a compressed planning schedule. In the construction phase, the reduced number of change orders will lessen the impact on the construction schedule and decrease incremental costs. Future year studies may include out-year construction projects and/or the considerations for the potential mandate of All-Day Pre-K.

The Office of School Construction oversees the planning and design for capital projects. Staff serve as the fiduciary agent for the administration of the Howard County Public School System/Board of Education construction contracts. The office recommends the selection of design consultants for capital projects to the Board of Education and supervises these consultants.

The West Friendship ES septic expansion is one example of a project that would be allocated funds from this budget line for planning and design.

Barrier-Free Projects: Project 0989

An accessibility ramp to access the upper level play area at Bryant Woods Elementary School.

Project Purpose

Barrier-Free Projects include modifications to make all spaces at school facilities accessible to the public, students, teachers, and staff. Federal, state, and local regulations require that school facilities be made accessible to the physically handicapped by removing barriers to access. Projects within the Barrier-Free fund include stadium bleacher ramps, play field access ramps, automatic door opening devices, reconfiguration of bathroom fixtures, alterations of drinking fountains and partitions to allow wheelchair access, and other school-specific projects that remove barriers as described in project details.

Barrier Free Actual Expenses			
Fiscal Year	Ac	tual Expense	
FY 2015	\$	23,580	
FY 2016	\$	54,747	
FY 2017	\$	234,811	
FY 2018	\$	316,622	
FY 2019	\$	181,825	

School Facilities oversees the Barrier-Free Projects. Actual costs incurred in the Barrier-Free Projects over the past five years is shown above.

Lift room for access to the stage.

FY 2021 Request Analysis

Project Funding (July 1, 2003 - June 30, 2020)	\$	5,753,000
Project Cost-to-Date (through June 30, 2019)		(5,555,412)
FY 2020 Projected Costs/Encumbrances		(197,588)
Available Project Funding (July 1, 2020)	\$	-
Requested Budget FY 2021	¢	200.000

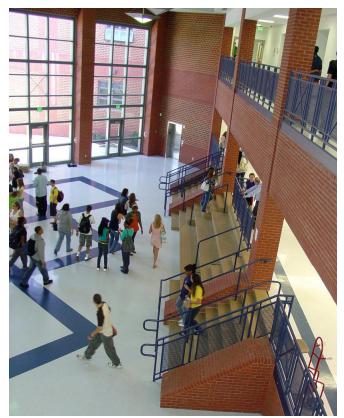

Project Details

The Americans with Disabilities Act (ADA) of 1990 is a comprehensive civil rights law that makes it unlawful for public and private employers to discriminate against individuals with disabilities. This law, as well as COMAR, and best risk management practices require that HCPSS be ready to adjust our physical plant for access. Funds support student needs and compliance with existing and new regulations as they relate to the ADA to ensure all students and staff have equal opportunities.

The barrier-free fund ensures our facilities full access to all students. When provide buildings are designed with accessibility in mind, issues are addressed in the schematic phase of a project. This practice generally produces buildings that are more accessible at the best cost.

With changing student enrollments, unique access issues may arise after the building is completed. This fund is used to make sensible, low-cost adjustments to improve overall access. This project funding is ongoing.

Annually, between two and four handicap door operators are replaced. Planning to install an ADA ramp over stairs near the gym is underway for Howard HS.

Elevator for transportation to the second-story level.

BOARD OF EDUCATION

POLICY 6020 SCHOOL PLANNING/SCHOOL CONSTRUCTION PROGRAMS

Effective: November 1, 2018

I. Policy Statement

The Board of Education is responsible for providing safe, nurturing, and inclusive educational and work environments for all students and staff. The Board recognizes the continuing need to plan, design, and construct new educational facilities and to renovate or make additions to existing schools that are in accordance with all applicable codes, as well as Maryland and federal law. Fulfilling this responsibility requires a comprehensive program that monitors population trends, enrollment trends, educational program spatial requirements, cost/benefit considerations, technologies that support environmentally responsible construction, and an annual six-year capital improvement program.

II. Purpose

The purpose of this policy is to establish guidelines for the administration of the school planning and the school construction programs in the Howard County Public School System (HCPSS).

III. Definitions

Within the context of this policy, the following definitions apply:

- A. Architect Firm A designation usually reserved by law for a person or organization professionally qualified and duly licensed to perform architectural services including, but not necessarily limited to, analysis of project requirements; creation and development of the project design; preparation of drawings, specifications, and bidding requirements; and general administration of the construction contract.
- B. Bid The price a contractor commits to for constructing a project.
- C. Bid and Award Procedures Criteria to determine the award of a contract pursuant to Policy 4050 Procurement of Goods and/or Services.
- D. Capital Improvement Program (CIP) All physical betterments or improvements listed as part of the Board's annual approved capital budget.
- E. Capital Improvement Project Any physical betterment or improvement and any preliminary studies and surveys relative thereto, including but not limited to, any property of a permanent nature, and equipment needed in connection with such improvement when first erected or acquired.

- F. Change Order A written document to the contractor signed by the owner and engineer or architect, issued after the execution of the contract, authorizing a change in the work or an adjustment in the contract sum.
- G. Construction Manager (CM) A person or organization hired to participate in the preconstruction phase of a project to provide cost estimating, project schedules, constructability reviews, and value engineering services, as well as coordinate and manage the overall project schedule and the construction phases of a project with the objective of minimizing project construction time and cost while maintaining the quality, function, and aesthetics of the building.
- H. Design Phases The three phases of an architect's basic services, which include:
 - 1. Schematic Design (SD) the first phase of the architect's basic services. In this phase, the architect meets with the project planning team to ascertain the requirements of the project and prepares schematic design studies consisting of drawings and other documents illustrating the scale and relationship of the project components for approval by the Board.
 - 2. Design Development (DD) the second phase of the architect's basic services. In this phase the architect prepares, from the approved schematic design studies, the design development documents for approval by the Board. These design documents consist of drawings and other documents to fix and describe the size and character of the entire project as to structural, mechanical and electrical systems, materials and other essentials as may be appropriate.
 - 3. Construction Documents (CD) the third phase of the architect's basic services. In this phase the architect prepares, from the approved design development documents, the working drawings, specifications, and necessary bidding information for approval by the Board.
- I. Facility Design Plans, elevations, sections, and other drawings and specifications that may be necessary for a building or other structure.
- J. Facility Planning Educational and architectural planning and analysis used to produce and design the concept for school projects.
- K. Interagency Commission on School Construction (IAC) The state agency responsible for the review/approval of construction documents and funding of schools or school construction projects.
- L. Office of Safety and Security The HCPSS office that is responsible for reviewing and monitoring the design and construction phases related to security initiatives and safety regulatory compliance.

- M. Office of School Construction The HCPSS office that is responsible for all phases of planning, design and construction of new schools as well as additions to and comprehensive modernization of existing schools, from planning through occupancy.
- N. Office of School Planning The HCPSS office that is responsible for projecting needs based on demographics for the purpose of assisting the Superintendent in the development of the Capital Improvement Program.
- O. Relocatable A prefabricated, stand-alone building providing temporary capacity for a school and that are excluded from program capacity.
- P. Scope Study Investigation and assessment of needs conducted to determine the magnitude of work for a particular project or facility.
- Q. State of Maryland Public School Construction Program (PSCP) Program that provides funding for public school construction.
- R. Sustainable Design Design that seeks to reduce negative impacts on the environment and the health and comfort of building occupants, thereby improving building performance. The objectives of sustainability are to reduce consumption of nonrenewable resources, minimize waste, and create healthy, productive environments.
- S. Target Utilization Enrollment between 90% and 110% utilization of the program capacity of a school facility.
- T. Utilization The comparison of a facility's program capacity and its enrollment or projected future enrollment.

IV. Standards

- A. This policy and associated implementation procedures apply to the capital improvement projects that are listed as part of the Board's annually approved capital budget, which requires contracts and consultant agreements.
- B. The HCPSS will employ a sustainable design construction that supports educational program needs and creates a safe and nurturing environment for students and staff within allotted budgetary resources.
- C. The school planning/school construction program will include a sequential plan of action and will be divided into the following ten general categories, each requiring professionally trained and experienced staff to plan and carry out the requirements of the program consistent with the Superintendent's Safety Guidelines for Renovation and Construction Projects and all applicable regulations.
 - 1. Long-Range Planning and Student Population Projection

- a. This category will involve the annual projection of pupil population growth by the Office of School Planning. Short-range demographic studies to support the Capital Improvement Program, school attendance area studies, transportation planning, and other special needs are also included.
- b. By state regulation, the Board is also required to develop, maintain, and annually update a master plan for the school system for submission to the IAC. This plan has as its basis a variety of population studies, which guide the decision making for school facilities on both a long and short-term basis.
- 2. Capital Improvement Program
 - a. The Capital Improvement Program is a projection of the school facility needs for the next fiscal year (Capital Budget) and the following five-year period. The Capital Improvement Program will be based on needs to support the educational program of the system with new schools, modernizations, and other construction projects.
 - b. The local Capital Improvement Program will serve as the basis for state funding requests through the IAC.
- 3. Site Selection

Procedures for site selection and summarization of site criteria for elementary, middle and high schools are addressed in Policy 6000 Site Selection and Acquisition. As part of the selection process, the Office of School Construction produces studies including site layouts and environmental assessments.

4. Architect Firm and Construction Manager Selection

Procedures for architectural and construction management services selection are addressed in Policy 6030 Procurement of Architectural and Construction Management Services.

5. Facility Planning and Facility Design

The facility planning and design process allows for orderly and systematic design of school facilities. This process begins with a scope study and will be conducted using either the Board-approved General Educational Specifications for New Elementary Schools, General Educational Specifications for New Howard County Middle Schools, General Educational Specifications for High Schools, or the Board approved Guidelines Manual for Renovations and Modernizations of Existing Schools as the basic references for the facility in question. These documents describe the basic educational philosophy, instructional program, and spatial requirements needed to implement the planning and construction program. 6. Bid and Award

The bid and award procedures for school construction projects conform to those used for the procurement of other goods and services, which are addressed in Policy 4050. In addition, these procedures comply with the funding requirements of the PSCP.

7. Contract and Construction Administration

The Office of School Construction will be responsible for monitoring construction work and administering the schedule, budget, and change orders that affect the scope and/or cost of the work. A school construction progress report, which includes these topics is submitted monthly to the Board.

In accordance with the provisions of Policy 6030, a construction manager may be hired to manage the construction process as well as to collaborate during the feasibility and design phases.

8. Official Acceptance of Capital Improvement Projects

Capital improvement projects may be designed to be accepted in stages or upon total completion of work, based on staff recommendation to and approval by the Board.

9. Post-Acceptance Evaluation

Use, occupancy, and evaluation by staff may occur only after the project has been officially accepted. The Board will receive a final report following the walk-through.

10. Relocatable Facilities

Relocatable classroom units should be considered under the following conditions and within the context of Policy 6010 School Attendance Areas:

- a. Where student population growth occurs
- b. Where utilization is projected to exceed target utilization
- c. When boundary lines are adjusted
- d. Where population is projected to remain above target utilization for at least one year
- e. Where school construction or renovation projects require the provision of swing space to accommodate the student population and minimize the impact on instruction.

Where excess population is projected to remain beyond four years, consideration should be given to an addition or new construction.

D. To the extent possible, school facilities and sites should be available for after school use by the community. The possibility of joint use development of school and recreational facilities, including joint construction of school and recreational space, is encouraged on a case-by-case basis.

V. Responsibilities

- A. The Superintendent/designee will oversee the overall administration of the school planning and construction programs.
- B. The Office of School Facilities will assist with design reviews and post-construction maintenance.
- C. The Office of the Environment will review and monitor the design and construction phases related to environmental initiatives and occupational regulatory compliance.
- D. The Office of School Planning and the Office of School Construction will collaborate with all appropriate internal and external parties in order to obtain the efficient implementation of this policy.
- E. For capital improvement projects, the principal will communicate project information to the parents and the community in a timely manner.

VI. Delegation of Authority

The Superintendent is authorized to develop appropriate procedures to implement this policy.

 Safety Guidelines for Renovation and Construction Projects

VIII. History

ADOPTED: September 4, 1968 REVIEWED: MODIFIED: August 14, 2014 November 1, 2018 REVISED: September 13, 1990 January 14, 2010 EFFECTIVE: November 1, 2018

POLICY 6020-IP IMPLEMENTATION PROCEDURES

SCHOOL PLANNING/SCHOOL CONSTRUCTION PROGRAMS

Effective: November 1, 2018

These procedures apply to the construction of new schools and the modernization/renovation of existing facilities that are included in the Board's Capital Improvement Program.

I. Definitions

Within the context of these implementation procedures, the following definitions apply:

- A. Beneficial Occupancy The use by the owner of a project or portion thereof before all the terms of the contract are complete.
- B. Bonds General obligation documents issued by the county to borrow money to fund capital projects.
- C. Final Occupancy The point at which all or a designated portion of a building complies with the provisions of a contract and all applicable county and state statutes and regulations.
- D. Projection Methodology Procedure to develop student enrollment projections that includes, but is not limited to historical cohort survival ratios, birth rates, new housing units, housing resales, apartment turnover and net migration.
- E. Punch List List made near the completion of work, indicating items to be furnished or work to be performed by the contractor or subcontractor in order to complete the work as specified in the contract documents.
- F. Warranty/Guarantee Period Period of time in which the quality of work and/or satisfactory performance is guaranteed.

II. Long-range Planning and Student Population Projection

The Office of School Planning will:

- A. Gather enrollment, birth, population, and housing data from appropriate sources.
- B. Provide an annual projection using the cohort survival method or other established projection methodology.
- C. Provide an annual report of projection accuracy to the Board of Education.

III. Capital Improvement Program

The Office of School Planning and the Office of School Construction will:

- A. Develop the Capital Improvement Program based on student population growth and anticipated needs of that population.
- B. Present the Board's requested six-year Capital Improvement Program, which includes a request for the next fiscal year (capital budget) and the following five-year period.
- C. Prepare the State of Maryland Public School Construction Program (PSCP) budget funding request.
- D. Incorporate the state budget request with the Board six-year Capital Improvement Program to determine the annual county Capital Improvement Program request.
- E. Select and analyze potential school site(s).

IV. Site Selection

Site selection and acquisition is recommended to the Board after being analyzed for appropriateness for a school. (See Policy 6000 Site Selection and Acquisition.)

V. Architect Firm and Construction Manager Selection

Procurement of architectural and construction management services are recommended to and approved by the Board in compliance with Policy 6030 Procurement of Architectural and Construction Management Services.

VI. Facility Planning and Facility Design

A facility planning team is convened, consisting of school and community members, personnel from the Office of School Construction, a designee from the Office of Safety and Security, other Central Office personnel, such as the Offices of the Environment, Facilities, Food and Nutrition Services, Pupil Transportation, the project architect, construction manager, and others who may be named by the Superintendent/designee. The planning team provides input to the architect in developing a series of three design studies that meets Board policy as well as the objectives of the applicable educational specifications or renovation guidelines.

The series of three design phase studies are as follows:

- A. Schematic Design Phase
 - 1. Planning team named by the Superintendent/designee
 - 2. Description of conceptual design

- 3. Initial cost analysis
- 4. Presentation to and approval by the Board.
- B. Design Development Phase
 - 1. Description of the design
 - 2. Detailed layouts of subject areas
 - 3. Cost analysis
 - 4. Presentation to and approval by the Board.
- C. Construction Documents Phase
 - 1. Description of the final design
 - 2. Cost analysis and cost reduction
 - 3. Final review of drawings and specifications
 - 4. Presentation to and approval by the Board
 - 5. Preparation of bid documents.

The above steps may be combined. In each phase, the effect on the occupants, the building structure, and/or systems is considered. Each phase is submitted for review and approval by the Board and the Interagency Commission on School Construction (IAC). Copies of the Howard County Public School System (HCPSS) response to the design submission review letters from the IAC approving agencies will also be submitted to the Board.

VII. Bid and Award

Pursuant to Policy 4050 Procurement of Goods and/or Services, these procedures call for a publicly announced bid period during which interested bidders examine the bid documents and submit a sealed bid by the date and time required. The bid documents are opened in public and the price submitted for each bid item is read aloud. At a subsequent meeting of the Board, the results of the bid are presented and a recommendation to award to the lowest responsible and responsive bidder is made.

The final decision is made by the Board. Upon submission of all documents, bonds, and other matters required in the contract, a formal contract is signed.

VIII. Contract and Construction Administration

A. Office of School Construction

The project architect administers the contract, answers technical questions, approves submittals, and initiates change orders and requests for proposals subject to the Board's approval. The Office of School Construction coordinates the completion schedule with the principal/designee and other school system personnel to ensure that furniture and equipment deliveries, technology services, and food services satisfy the requirements for their respective sections. Prior to the opening of school, the Office of School Construction monitors each project to resolve any last minute problems and continues this supervision during the warranty period.

The Office of School Construction supervises the construction, budget, schedule, and quality of work, administers change order requests, and administers the warranty period. When school projects are technically complex, have a very short construction time, or require staff attention beyond the time available, a construction manager may be hired to manage the construction process.

B. Offices of the Environment, Facilities and Safety and Security

The Offices of the Environment, Facilities and Safety and Security monitor the design and construction phases at regular intervals and in response to specific concerns. Consistent with all statutory requirements, monitoring includes Integrated Pest Management (IPM), Indoor Air Quality (IAQ), and abatement of potentially hazardous materials.

IX. Official Acceptance of Capital Improvement Projects

New facilities and other capital improvement projects may be accepted in several ways. If conditions permit, the school system will wait until all major and minor building system corrections are fully complete and all minor repairs, deficiencies and discrepancies (punch list items) have been corrected. The project architect will then certify that the building is complete and has been constructed according to the drawings and specifications. This marks the beginning of the warranty/guarantee period for the building. School facilities are typically scheduled so that all construction will be complete and the building ready for acceptance in early summer. Final inspection and acceptance involves a review of the project at substantial completed by the contractor's "punch list." In most cases, the project is complete except for minor system work and completion of the punch list items by late summer.

The Office of School Construction is responsible for certifying, as applicable, beneficial occupancy, final occupancy, move-in, punch list, and warranty/guarantee.

X. Post-Acceptance Evaluation

A. After project acceptance, furnishings and movable equipment can be installed, supplies can be delivered and stored, and the staff can occupy the facility for operation. At this time, the construction project enters into a one year guarantee and a two year mechanical/electrical guarantee period during which time discrepancies in the workmanship, materials, and equipment supplied under the contract are noted and corrected. Some specifically identified warranties/guarantee periods may be longer than one to two years.

- B. Following the move-in, the Office of School Construction works closely with the school administration and maintenance personnel to correct any problems that arise during the warranty period.
- C. After the first instructional year following construction, a walk-through of the facility is conducted to evaluate the success of the facility as a teaching environment and the success of the educational concepts in the General Elementary Educational Specifications for New Schools, or General Educational Specifications for New Howard County Middle Schools, or General Educational Specifications High Schools or Guidelines Manual for Renovations and Modernizations of Existing Schools in effect at the time the project was designed. The facility is also evaluated as to use of materials, building systems, construction quality, and other aspects pertaining to the building.
- D. A walk-through of the building by a representative team of stakeholders may include a:
 - 1. Teacher representative
 - 2. Administration personnel
 - 3. Custodian
 - 4. PTA representative
 - 5. School facilities representative(s); and
 - 6. Designee from the Offices of Safety and Security.

XI. Relocatable Facilities

Placement of relocatable facilities is determined by and implemented as follows:

- A. Presentation of student population projections.
- B. Identification of where new units are needed.
- C. Evaluation of site plans.
- D. Evaluation of cost implications.
- E. Presentation to and approval by the Board.
- F. Reassignment or procurement of units.
- G. Installation of units.

H. Post installation inspection by the Office of School Construction.
