September 29, 2026

Members of the Board of Education
and Citizens of Howard County, Maryland:

Transmittal Letter of the Annual Comprehensive Financial Report

Maryland state law requires that local education agencies publish at the close of each year a complete set of financial statements presented in conformity with accounting principles generally accepted in the United States and audited in accordance with auditing standards generally accepted in the United States by a firm of licensed certified public accountants. In compliance with that requirement, the Division of Financial Management (the Division) hereby submits the Annual Comprehensive Financial Report of the Howard County Public School System (HCPSS) for the fiscal year ended June 30, 2026.

This report has been prepared pursuant to Education Article Section 5-109 of the Annotated Code of Maryland. The report consists of management's representations concerning the finances of HCPSS. Management assumes full responsibility for the completeness, reliability, and accuracy of the presented data. We believe the data as presented is accurate in all material aspects and is presented in a manner designed to set forth the financial position and results of operations of HCPSS as measured by the financial activity.

All matters relating to education and operations in HCPSS are governed and controlled by the Board of Education of Howard County (the Board), as provided by the Public School Laws of Maryland. The Board has the responsibility to maintain a reasonable, uniform system of public schools to provide quality education for all young people of Howard County. With the advice of the Superintendent, the Board establishes schools and determines geographical attendance areas for them. Upon recommendation of the Superintendent, the Board approves education policy and prescribes the rules and regulations for the management and conduct of the School System. The activities, funds and entities related to HCPSS included in this Annual Comprehensive Financial Report are those for which the Board exercises oversight responsibility.

All funds and accounts of HCPSS are included in this Annual Comprehensive Financial Report. For financial reporting purposes, the Board has been defined as a component unit of the Howard County Government. Therefore, HCPSS is included in the audited Annual Comprehensive Financial Report for Howard County, Maryland (the County).

HCPSS financial statements have been audited by SB & Company, LLC, an independent audit firm of licensed public accountants. The report of independent public accountants is located at the front of the financial section of this report. Management's Discussion and Analysis (MD&A) immediately follows the report of independent public accountants and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter and should be read in conjunction with it.

Entity Services

Located in central Maryland, HCPSS serves a diverse population exceeding 57,000 students. The school system consistently ranks among Maryland's top school districts and is focused on preparing students to be life ready upon graduation. HCPSS' 2025 graduation rate of 91.3% exceeds the state average.

Graduating Class of 2025 Academic Awards*

- 31,653 College applications submitted
- 1,780 Students offered at least one scholarship
- \$117,287,685 Scholarship money awarded to graduates
- 1,560 Students were accepted to an Ivy League college or university
- 2,169 Students were accepted to a Historically Black College or University (HBCU)
- 322 Seniors took a total of 706 courses for college credit under the JumpStart Enrollment program
- 657 Students earned Industry Recognized Credentials
- 1,264 Completed a Maryland CTE Program
- 94 Students participated in an apprenticeship

* Reflects 85% of seniors completing survey

Source: Board Report 2025 07-17 Summary of the Accomplishments of the Class of 2025

HCPSS had experienced steady enrollment growth until the COVID-19 Pandemic began in March 2020. However, enrollment levels have largely remained flat since 2021 with a slight uptick seen in the 2023 actual. HCPSS has seen consistent growth in student enrollment in populations that require additional services. Growing segments of our student population that require greater student supports and resources include poverty, homelessness, and language barriers. While current projections show a decline in the rate of student enrollment growth, HCPSS continues to address the current capacity needs of the school system. Capital costs also continue to grow each year due to the increased costs associated with the commercial industry.

HCPSS operated 78 schools in the 2025–2026 academic year, with the average age of school facilities ranging from 43.3 years for elementary schools to 37.5 for middle schools and 42.8 years for high schools. A wide range of support services are offered to Howard County students and parents through guidance counselors, nurses, psychologists, and student personnel workers. Students with special needs are provided with an extensive special education program at preschool, elementary, middle, and high school instructional levels.

This report includes the financial activities of HCPSS as they relate to the services provided for a Pre-K–12 public school system of 42 elementary schools, 20 middle schools, 13 high schools and 3 education centers. There currently are no charter schools in Howard County.

Economic Condition and Outlook

In FY 2026, HCPSS received approximately 52% of its governmental activities funding from Howard County, approximately 21% from state and federal sources and 3% from other sources. Accordingly, the economic condition and outlook of the County play a substantial role in the economic condition and outlook of HCPSS. At the same time, HCPSS remains a cornerstone of the County, as residents continue to be drawn to the quality and reputation of the school system. Following significant growth in its workforce, the Johns Hopkins University Applied Physics Laboratory surpassed HCPSS as the County's largest employer during FY 2026. Nevertheless, HCPSS remains one of Howard County's largest employers and continues to serve as a significant economic engine within the County.

Total budgeted state and federal funding increased in the FY 2026 Operating Budget from \$353.8 million to \$376.6 million, driven by the ongoing implementation of per-pupil funding increases required in the Blueprint for Maryland's Future legislation. Total budgeted local funding increased from \$767.5 million to \$817.3 million.

Long-term Financial Planning

The HCPSS Operating Budget planning is intrinsically linked with planning for the Capital Budget and redistricting processes.

Transmittal Letter

The FY 2026 Approved Operating Budget for HCPSS meets the funding necessary to support the school system, incorporates the mandates of the Blueprint for Maryland's Future and addresses inequities and invests in resources that will enhance the academic success and social emotional well-being for each student in an inclusive and nurturing environment that closes opportunity gaps.

The HCPSS local Every Student Succeeds Act (ESSA) Consolidated Strategic Plan reflects the district's commitment to educating our entire student population, one child at a time. The plan fulfills our obligation to the Maryland State Department of Education to integrate federal, state, and local funding and initiatives into a comprehensive master plan to improve achievement for all students and ensure that all student groups meet state standards. Each year HCPSS prepares an annual operating budget that supports the ESSA Consolidated Strategic Plan. School officials and the Board target funding to ensure the goals established in the HCPSS Strategic Plan are achieved.

Annually, HCPSS prepares a five-year Capital Improvement Program (CIP) and a 10-year Long-Range Master Plan. The CIP identifies projected capital needs, including new facilities and maintenance projects required to keep HCPSS facilities in good operating condition.

School System Budget

The school system budget is proposed by the Superintendent of Schools and reviewed by the Board of Education. The Board's budget request is submitted to the County Executive. The County Executive makes recommendations and forwards the budget to the County Council. The County Council can accept the County Executive's recommendations, make additional reductions, or restore funds cut from the school system budget by the County Executive.

The FY 2026 Approved Operating Budget (Revised) increased by \$71.1 million over the FY 2025 Approved Operating Budget. The FY 2026 budget advances major goals including implementation of Blueprint requirements, continued investments toward students' educational success, and providing for competitive growth in employee compensation.

The FY 2026 Approved Budget was developed based on a projection of 57,806 students, which is slightly more than the enrollment projection of 57,566 used to develop the FY 2025 budget.

Internal Controls

To assure the integrity of the financial record supporting the financial statements, consideration is given to the adequacy of internal accounting controls sufficient to provide reasonable assurance that assets are properly safeguarded, accounted for, and are used only in accordance with management authorization. The concept of reasonable assurance recognizes that the cost of control should not exceed the benefits likely to be derived, and evaluation of costs and benefits requires estimates and judgments by management.

Budgetary Controls

The annual budget serves as the foundation of the Board's financial planning and budgetary controls. The objective of the budgetary controls is to ensure compliance with legal provisions embodied in the annual appropriated budget approved by the Board.

The budget is organized into State-mandated categories of expenditures including Administration, Mid-level Administration, Instructional Salaries, Textbooks and Instructional Supplies, Other Instructional Costs, Special Education, Student Personnel Services, Health Services, Student Transportation, Operation of Plant, Maintenance of Plant, Fixed Charges, Community Services, Capital Outlay, and Food Service.

Transmittal Letter

In addition to internal controls, HCPSS maintains budgetary controls. The legal level of budgetary control is at the operating fund total and the State category level. Budget authority may be reallocated within each State category administratively to align with expenditure needs. However, the total expenditure level for the operating fund and a state category cannot be exceeded without approval by the Board of Education and the County Council. The objective of these budgetary controls is to ensure compliance with legal provisions of the appropriation authority. Management control is maintained at levels within each organizational unit along with an encumbrance accounting system as one technique of accomplishing budgetary control.

Independent Audit

The financial statements for FY 2026 have been audited by SB & Company, LLC in accordance with Section 5-109 of the Public School Laws of Maryland. In addition to meeting the requirements set forth in State statutes, SB & Company, LLC also performs a separate audit to meet the requirements of the Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). That report will be issued at a later time. The auditor's report on the financial statements is included in the Financial Section of this report. The report of independent public accountants on the School System's basic financial statements includes an unmodified opinion for all opinion units.

Awards and Acknowledgments

The Association of School Business Officials (ASBO) International awarded the Howard County Public School System its Certificate of Excellence in Financial Reporting for the fiscal year ended June 30, 2025. This award reflects our commitment to the highest standards in School System reporting.

A Certificate of Excellence is valid for a period of one year. We believe that our current annual comprehensive financial report will continue to meet the program's requirements, and we are submitting it to ASBO and Government Finance Officers Association (GFOA) to determine its eligibility for certificates from both organizations.

Following release of the Annual Comprehensive Financial Report for FY25, HCPSS was awarded GFOA's Certificate of Achievement for Excellence in Financial Reporting for FY24. While we anticipate receiving this award for our prior year's FY25 submission, it is still in the review process.

The preparation of this report could not have been accomplished without the efficient and dedicated services of the entire Accounting staff. The high standard of conformity of this report reflects the professional competence of all the individuals responsible for its preparation. I wish to express our appreciation for a job well done.

Conclusion

This report has been prepared to provide financial information for the fiscal year ended June 30, 2026 in a manner consistent with the goals and objectives of the Board of Education of Howard County. Should you have any questions about the financial details, needs or plans for the Howard County Public School System, please do not hesitate to call, or write. Contact information is included at the end of the MD&A on page [39](#).

Respectfully submitted,

M. Brian Hull

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

The Board of Education
Howard County, Maryland

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Howard County Public School, a component unit of Howard County, Maryland, as of and for the year ended June 30, 2026, and the related notes to the financial statements, which collectively comprise HCPSS's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of HCPSS, as of June 30, 2026, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of HCPSS, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

HCPSS's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the HCPSS's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the HCPSS's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the HCPSS's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information, schedule of the Board's proportionate share of the net pension liability-Maryland State Retirement and Pension System, schedule of the Board's contributions- Maryland State Retirement and Pension System,, and the schedule of Employer's proportionate share of net OPEB liability, and schedule of the Board's contributions-OPEB be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses

SB & Company

CPAs and Business Advisors

to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise HCPSS's basic financial statements. The detailed budgetary comparison schedules, combining fund financial statements, and the schedule of school activity fund increases and decreases as listed in the accompanying table of contents. (collectively, Other Supplementary Information) are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The Other Supplementary Information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Other Supplementary Information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual comprehensive financial report. The other information comprises the introductory and statistical sections but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated September 29, 2026 on our consideration of HCPSS's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of HCPSS's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering HCPSS's internal control over financial reporting and compliance.

Management's Discussion and Analysis

Management's Discussion & Analysis

Introduction

As Management of the Howard County Public School System (HCPSS, School System or Board), we have prepared the following discussion and analysis to inform readers of the HCPSS's annual financial report about the financial information that the enclosed statements present for the year ended June 30, 2026 with selected comparative data for the year ended June 30, 2025. We encourage readers to consider the discussion and analysis along with the other information in this report, including the summary of significant accounting policies and notes to the basic financial statements. In this section we have provided an overview of the basic financial statements, selected condensed data and highlights, and analysis of the HCPSS's financial position and changes in financial position.

Financial Highlights for FY 2026

Government-wide financial statements

- The School System's financial status as of June 30, 2026, and as reflected in total net position, increased by \$44.1 million to \$438.5 million from \$394.4 million. This increase was driven primarily by a \$77.2 million decrease in the School System's long-term OPEB liability, resulting from an increase in the discount rate used to measure the liability from 4.80% to 5.40%, consistent with a corresponding rise in long-term municipal bond yields. These savings were the result of an actuarial remeasurement and do not reflect actual cash savings to the School System. These favorable movements were partially offset by a \$6.0 million increase in current liabilities.
- General revenues accounted for \$1.189 billion, including \$817.9 million in local appropriations and \$322.3 million in aid from the state and federal governments. Program revenues, in the form of charges for services, operating grants and contributions, and capital grants and contributions, accounted for \$378.9 million. The total revenue from all sources was \$1.568 billion.
- The School System had \$1.524 billion in expenses related to programs, an increase of \$18.7 million from the prior year. The increase in expenses is primarily due to an increase in salaries and benefits costs, and student transportation.

Governmental funds financial statements

- The overall fund balance of the General Fund, the primary operating fund, increased by \$3.7 million to \$28.8 million from \$25.1 million. This increase reflects favorable budget variances, including expenditure savings in instructional categories and student transportation, partially offset by the planned use of fund balance to support the FY 2026 budget. The General Fund balance is comprised of \$0.6 million in nonspendable fund balance related to prepaid items and inventories, \$19.8 million assigned for subsequent year's budgeted appropriation of fund balance and outstanding encumbrances (see Note IX), and \$8.4 million in unassigned fund balance.

Short-Term Financial Position and Liquidity

As of June 30, 2026, the School System's total current and other assets were \$272.5 million, compared to total current liabilities of \$174.4 million, resulting in a positive net current asset position of \$98.2 million. This represents a modest improvement from June 30, 2025, when current and other assets of \$263.3 million exceeded current liabilities of \$168.3 million by \$95.0 million.

The School System's most readily available liquid resources consisted of \$155.6 million in investments held in the Maryland Local Government Investment Pool (MLGIP) — a AAAM-rated, same-day-liquidity money market pool — and \$47.6 million in cash deposits, together totaling approximately \$203.2 million. These resources, combined with recurring local appropriations and state and federal aid, are the School System's primary sources for meeting near-term obligations.

Management's Discussion & Analysis

Near-term obligations as of June 30, 2026 consisted principally of:

- Accounts payable and retainage payable of \$15.3 million
- Accrued liabilities of \$113.0 million
- Unearned revenue of \$34.3 million
- The current portion of lease and subscription-based information technology arrangement (SBITA) liabilities, totaling \$3.6 million
- The current portion of compensated absences and workers' compensation liabilities, totaling \$5.7 million

Because the School System is fiscally dependent on Howard County, the State of Maryland, and the federal government for the substantial majority of its funding, and because it has no authority to issue debt on its own behalf, its short-term liquidity risk is closely tied to the timing and reliability of intergovernmental funding rather than to market-based financing risk. Management is not aware of any conditions expected to impair the School System's ability to meet its obligations as they become due within the next fiscal year.

Overview of the Basic Financial Statements

This discussion and analysis is intended to serve as an introduction to the School System's basic financial statements as reflected in Figure 1. The School System's Basic Financial Statements are comprised of three parts:

1. Government-wide Financial Statements include the Statement of Net Position and the Statement of Activities which provide a broad, long-term overview of the School System's overall financial condition.
2. Fund Financial Statements include governmental and proprietary funds. These statements provide a greater level of detail of revenues and expenditures and focus on individual parts of the School System, while also indicating how well the School System has performed in the short-term, in the most significant funds.
3. Notes to the Basic Financial Statements are disclosures to ensure that a complete picture is presented in the financial statements.

Figure 1 - Organization of the Annual Comprehensive Financial Report

Management's Discussion & Analysis

Government-wide Financial Statements

The Government-wide Financial Statements are designed to provide readers with a broad overview of the HCPSS finances, in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the School System's financial position, which assists in assessing the School System's economic condition at year-end. They are prepared using the economic resources measurement focus and full accrual basis of accounting. These are methods similar to those used by most businesses. They take into account all revenues and expenses connected with the fiscal year even if the cash has not been received or paid. The Government-wide Financial Statements include two statements:

The Statement Of Net Position presents all of the school system's assets, liabilities, and deferred inflows/outflows of resources with the difference between the categories reported as "net position." The statement combines and consolidates all of the School System's current financial resources (short-term spendable resources) with capital assets (net of accumulated depreciation) and liabilities, distinguishing between governmental and business-type activities. The end result is net position segregated into three components: net investment in capital assets, restricted, and unrestricted net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the School System is improving or deteriorating.

The Statement Of Activities presents information showing how the School System's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows, in future fiscal periods (such as earned, but unused, vacation leave). This statement also presents a comparison between direct expenses and program revenues for each function of the School System. The majority of the School System's revenue is general revenue, grants, and contributions from other governments.

Both of the above statements include separate sections to distinguish between those that are supported primarily by intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant part of their costs through fees and charges (business-type activities).

The activities in the Government-wide Financial Statements are divided into two categories, governmental activities and business-type activities.

- Governmental activities include the HCPSS basic services which are administration, instruction, student personnel and health services, student transportation, operation and maintenance of plant, capital outlay, special education, community services, food services, and mid-level administration. County appropriations, and state and federal aid finance most of these activities.
- Business-type activities are financed in whole or in part by fees charged to external parties for goods or services. The HCPSS reports the activities of the Jim Rouse Theatre as a business-type activity.

The government-wide financial statements can be found on pages [42-44](#) of this report.

Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The HCPSS uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The fund financial statements provide more detailed information about the HCPSS funds, focusing on the most significant or "major" funds—not the HCPSS as a whole. The HCPSS fund financial statements provide detailed information about its most significant funds.

All of the funds of the HCPSS can be divided into two categories: governmental funds and proprietary funds.

Management's Discussion & Analysis

Governmental Funds

Most of the basic services provided by the School System are accounted for in governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources. They also focus on balances of spendable resources available at the end of the fiscal year. This approach is known as using the flow of current financial resources measurement focus and the modified accrual basis of accounting.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. These reconciliations are presented on pages [46](#) and [48](#) of this report, respectively.

The governmental fund financial statements can be found on pages [45](#) and [47](#) of this report.

Proprietary Funds

Proprietary funds are used to show activities that operate more like those of commercial enterprises. These types of funds charge fees for services that are provided to outside customers. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. Like the government-wide financial statements, proprietary fund financial statements use the full accrual basis of accounting and the economic resources measurement focus. Therefore, no reconciliation is needed between the government-wide financial statements for business-type activities and the proprietary fund financial statements.

Proprietary funds include an enterprise fund and internal service funds. The HCPSS has one (1) enterprise fund and four (4) internal service funds. The enterprise fund captures the activity of the Jim Rouse Theatre. The internal service funds are: Print Services, Technology Services, Health and Dental, and Workers' Compensation.

The proprietary fund financial statements can be found on pages [49–51](#) of this report.

Summary of Significant Accounting Policies and the Notes to Financial Statements

The Summary of Significant Accounting Policies and Notes to Financial Statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The summary and notes can be found on pages [55–81](#) of this report.

Other Information

In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information concerning the HCPSS's budget process. The HCPSS adopts an annual expenditure budget for all governmental funds. The School System's General Fund has a legally adopted budget. Management also prepares budgets for the other governmental funds for internal monitoring purposes only. The budget to actual comparison for the General Fund is presented as required supplementary information for the School System's basic financial statements. The required supplementary information and other supplementary information can be found on pages [84–105](#) of this report.

Management's Discussion & Analysis

Financial Summary and Detailed Analysis

The School System is a component unit of Howard County, Maryland (the County), and is fiscally dependent on the County and the state to appropriate funding for the School System. The School System receives approximately 52.2% of its governmental activities funding from the County and approximately 20.6% from state and federal. Additionally, the School System receives federal entitlement grants and competitive grants from the state and federal governments. Essentially all of the School System's funding for governmental activities is derived from these sources. The School System has no authority to levy taxes or issue bonded debt. Accordingly, the financial condition of the School System is directly related to the financial condition of the funding authorities, the County and state. Any appropriated funds that are unspent at the end of a fiscal year must be re-appropriated by the County government in a subsequent fiscal year.

Government-Wide Financial Analysis

Net Position

As noted earlier, net position over time may serve as a useful indicator of a government's financial position. In the case of the School System, net position from governmental activities was \$438.0 million at the close of the most recent fiscal year.

The most significant portion of the School System's net position (320.0%) reflects its net investment in capital assets (land, buildings, vehicles, and equipment). The School System uses these assets to provide an education to the students of the County. Consequently, these assets are not liquid, nor available for future spending or liquidation of any liabilities. Any school buildings that are no longer used by the School System are returned to the County, since the County is the primary funding source for school buildings. Because the School System has no authority to issue bonded debt, the only debt outstanding related to capital assets are leases for energy performance, and the purchase of equipment including technology equipment and software. The County and/or state government may issue debt to finance school construction; however, it is not debt of the School System and is not reported in these financial statements. Consequently, school buildings and construction in progress related to school buildings appear in the School System's Statement of Net Position, while any related outstanding debt issued by the county or state government does not.

The HCPSS's financial position is the net result of activities, the acquisition and disposal of capital assets, and the depreciation of capital assets.

To assess the overall financial position of the HCPSS, additional non-financial factors, such as changes in the County property tax base and the condition of school buildings and other facilities, should be considered.

Management's Discussion & Analysis

Table 1 provides a summary of the HCPSS's net position as of June 30, 2026 and 2025:

Table 1 - Net Position – As of June 30, 2026 and 2025 (In Thousands)

	Governmental Activities		Business-Type Activities		Total Activities	
	2026	2025	2026	2025	2026	2025
ASSETS						
Current and other assets	\$ 272,049	\$ 262,825	\$ 465	\$ 474	\$ 272,514	\$ 263,299

Technology services	1,000	8,000	—	—	1,000	8,000
Health and dental	—	3,000	—	—	—	3,000
Unrestricted	(994,440)	(1,028,366)	421	426	(994,019)	(1,027,940)
TOTAL NET POSITION	<u>\$ 437,975</u>	<u>\$ 393,895</u>	<u>\$ 510</u>	<u>\$ 489</u>	<u>\$ 438,485</u>	<u>\$ 394,384</u>

Change in Net Position

The School System's net position increased by \$44.1 million. Since the School System is fiscally dependent on the County, State, and Federal governments, expenses closely match revenues, with the exception of timing differences in relation to when an expense is recognized. The funding government(s) appropriate funds to the School System, which it spends to accomplish its goal of providing education to the children of the County. Any unspent funds are re-appropriated in subsequent fiscal years from fund balance by the County.

Management's Discussion & Analysis

Table 2 shows the changes in net position for the years ended June 30, 2026 and 2025. Key elements of this increase are as follows:

Table 2 - Change in Net Position – As of June 30, 2026 and 2025 (In Thousands)

Management's Discussion & Analysis

Government-Wide Revenues and Expenses

Figures 2 and 3 display government-wide revenues and expenses, respectively, for the current year. Revenues for the HCPSS combined activities (which include program revenues and general revenues) increased to \$1.568 billion. Local appropriations and state and federal aid accounted for most of the HCPSS revenue. Funds from these two sources contributed approximately 72.7% of every dollar needed. The remaining 27.3% came from Operating Grants and Contributions; Capital Grants and Contributions; fees charged for services; and other miscellaneous revenues. Total revenues surpassed expenses, increasing net position by \$44.1 million over last year.

The increase in revenues was primarily driven by:

- Higher state aid, particularly through increases in Blueprint for Maryland's Future funding, including allocations for Concentration of Poverty, Pre-K expansion, and College and Career Readiness programs.
- Increased local appropriations as a result of Maintenance of Effort requirements and supplemental local support, tied to teacher compensation and benefit increases and inflation adjustments.
- Federal revenues, including continued utilization of remaining ESSER funds, which supported instructional recovery, extended learning, and mental health services.

The total cost of all programs and services rose to \$1.524 billion. Most of the HCPSS expenses are related to instruction (including special education), instructional support and student transportation services. Expenses in these areas comprised 80.1% of all School System expenditures. The business and administration activities, food services, and community services accounted for 9.24%, 1.44%, and 0.25% of total costs, respectively. Maintenance and operation expenses represented approximately 8.12%. Generally, increases in expenses closely paralleled inflation and growth in the demand for services.

The combination of structural cost growth, time-limited federal support, and long-term commitments under state reform initiatives contributed to the year-over-year increase in net position.

Figure 2 - Source of Revenues - FY 2026

Figure 3 - Expenses by Category - FY 2026

Management's Discussion & Analysis

Governmental Activities

Table 3 presents the cost of the 13 categories of the HCPSS: instruction – regular and special education, administration, mid-level administration, student and health services, student transportation services, operation of plant, maintenance of plant, community services, food services, interest on long-term debt and student activities. The table also shows each activity's net cost (total cost less fees generated by the activities and intergovernmental aid provided by specific programs).

Table 3 - Cost of Governmental Activities - Year Ended June 30, 2026
(In Thousands)

	Total Cost of Services	Less Program Revenues	Net Cost of Services
Instruction			
Regular education	\$ 789,962	\$ 190,673	\$ (599,289)
Special education	317,880	90,149	(227,731)
Support services			
Administration	20,375	3,185	(17,190)
Mid-level administration	120,403	15,640	(104,763)
Student personnel services	20,084	3,097	(16,987)
Health services	19,353	2,677	(16,676)
Student transportation	73,561	26,268	(47,293)
Operation of plant	86,231	8,709	(77,522)
Maintenance of plant	37,538	2,687	(34,851)
Community services	3,838	2,474	(1,364)
Food services	21,968	21,518	(450)
Interest on long-term debt	837	—	(837)
Student activities	11,359	11,532	173
Total	\$ 1,523,389	\$ 378,609	\$ (1,144,780)

Business-Type Activities

HCPSS has one business-type activity: the operation of the Jim Rouse Theatre, a performing arts venue used by both School System programs and community organizations.

In fiscal year 2026, operating revenues totaled \$321.2 thousand, a decrease of \$28.6 thousand, or 8.2%, compared to the prior year. The decline was primarily attributable to fewer events and performances held at the venue during the year.

Operating expenses increased by \$44.2 thousand (16.2%) to \$316.7 thousand, largely due to higher staffing and labor costs.

As a result, the Jim Rouse Theatre generated net operating income of \$4.5 thousand, supplemented by \$15.8 thousand in non-operating interest income, and continued to operate on a self-sustaining basis. This performance demonstrates the Theatre's ongoing value as both a cultural asset and a financially sustainable component of the School System's business-type activities. Details of the business-type activity can be found on pages [49-51](#) of this report.

Financial Analysis of Governmental Funds

The focus of the School System's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the School System's financing requirements. In particular, the unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year. As of the end of the current fiscal year, the School System governmental funds reported combined ending fund balances of \$72.7 million, an increase of \$4.9 million. This includes nonspendable fund balance which is comprised of \$0.9 million in inventories and \$0.1 million in prepaid expenses. Restricted fund balance is comprised of \$1.6 million for the Glenelg Wastewater Treatment Plant and \$28.2 million for capital projects. Assigned fund balance includes \$7.9 million for the Grants fund, which \$5.2 million pertains to the School Activity Fund; \$10.0 million for encumbrances; and \$9.8 million for subsequent year's budgeted appropriation of fund balance. The unassigned fund balance as of June 30, 2026 was \$8.4 million in the General Fund.

It is important to note that the School System is fiscally dependent on grants and contributions from the County, state, and federal governments for its operating resources, as the School System has no authority to levy taxes or issue bonded debt.

During the fiscal year, the fund balance of the School System's general fund increased by \$3.7 million. In the approved FY 2026 budget, the HCPSS planned to utilize \$2.1 million of General Fund balance, a \$7.0 million transfer from the Technology Fund, and a \$3.0 million transfer from the Health Insurance Fund to cover the shortfall between budgeted revenues and expenditures.

However, the Local Education Agency (LEA) did not use any of the \$12.1 million budgeted use of fund balance or transfers. This favorable variance primarily resulted from:

- Higher than anticipated earnings on investments, contributing approximately \$1.8 million to revenues.
- Other sources of revenue from \$1.0 million in e-rate rebates and tuition revenue from increased participation.
- Lower than budgeted expenditures in various appropriated funding categories such as, health services and maintenance of plant due to turnover savings from salaries and wages of approximately \$1.9 million.
- Lower than budgeted expenditures in instructional categories, including salaries, textbooks, instructional supplies, and other instructional costs, largely due to position salary lapse and staff turnover, resulting in savings of approximately \$4.6 million.
- Budgeted expenditures of \$1.0 million for qualified private Prekindergarten providers for HCPSS students funded from the required state and local shares of State formula funding; however, the State paid the private providers directly.

The planned use of fund balance was an integral part of the LEA's budget balancing strategy, approved by Howard County Council, and was designed to support rising operational costs including negotiated salary and benefit increases, implementation of Blueprint for Maryland's Future initiatives, and inflationary pressures on supplies and services.

The variance between budgeted and actual fund balance use reflects the LEA's careful fiscal management and ability to identify expenditure savings and revenue enhancements throughout the year, reducing the reliance on fund balance while continuing to deliver quality educational services.

The fund balance of the Food Services Fund, a special revenue fund, decreased during the current fiscal year by \$3.7 million to \$6.2 million due to planned one-time expenditures aimed at reducing fund balance. The Glenelg Wastewater Treatment Plant fund finished with a fund balance of \$1.6 million.

Management's Discussion & Analysis

During FY 2026, the Capital Projects Fund balance increased by \$5.8 million, bringing the year-end balance to \$28.2 million. This increase is primarily attributed to the timing of project activity, including:

- Higher-than-anticipated transfer tax revenue deposits of \$6.4 million, which outpaced project expenditures during the year.
- A \$0.6 million increase in retainage payable, as several construction contracts progressed toward the construction phase, increasing the amount withheld for outstanding obligations.

Although funding continued to flow into the Capital Projects Fund, several large projects were in early phases or experienced slower-than-anticipated spending, resulting in a temporary accumulation of fund balance.

Significant capital projects during FY 2026 included ongoing construction activities for the Oakland Mills Middle School Renovation/Addition, additional planning and design for Dunloggin Middle School Renovation/Addition, planning and construction for the Applications and Research Lab Renovation, planning and design of Faulkner Ridge Center Renovation, as well as various systemic renovations and roofing projects throughout the district.

State funding decreased this period, from \$33.7 million in the prior year to \$24.1 million, during the annual budget cycle of the Interagency Commission on School Construction (IAC) funding process.

Looking ahead, the approved FY 2027 capital budget includes planned spending of \$727.6 million over the FY 2028–2032 period, submitted to the Howard County Council for approval. Given current economic conditions and volatility in construction and materials costs, cost estimates will require close monitoring to ensure adequate funding and timely project completion.

Significant Capital Asset Activity

The HCPSS had \$1.422 billion invested in land, construction in progress, buildings and improvements, furniture and equipment, leased buildings and equipment and subscription assets, net of accumulated depreciation and amortization at June 30, 2026.

Table 4 shows governmental activities capital asset balances, net of accumulated depreciation and amortization, as of June 30, 2026 and 2025. During FY 2026, capital assets increased by a net of \$20.6 million from the prior year. The depreciation and amortization expense on these assets was approximately \$50.0 million in FY 2026. More detailed information about capital assets can be found on pages [64–66](#) of this report.

Major governmental activities capital asset events during the current fiscal year included the following:

Capital Projects:

- Construction of Oakland Mills MS Renovation/Addition, continued planning and design of Faulkner Ridge Center and Dunloggin Middle School, and continued planning and construction of Applications and Research Lab Renovations
- Systemic Renovations project including HVACs, Boilers, Elevators, and Gym ACs
- Other major projects include roofing projects, playground projects, technology projects, parking lot projects, and relocatable classrooms

Leases/Subscription-Based Information Technology Agreements:

- Renewed lease agreements for Print Management (5 years), Office Space (3 years), and WTS Mail Tracking System (5 years)
- Renewed subscription agreement (4 years) for Firewall Security

Management's Discussion & Analysis

The HCPSS FY 2027 capital budget approved spending of \$16.8 million to continue construction activities for Oakland Mills MS Renovation/Addition, \$5.0 million to continue planning and design of Dunloggin MS Renovation/Addition, \$2.5 million for additional construction at Faulkner Ridge Center, \$5.3 million to begin planning for New Elementary School #43, \$6.5 million to begin planning for Patapsco Middle School Renovation/Addition, \$73.2 million for systemic renovations, \$6.8 million for roofing projects, \$1.6 million for relocatable classroom projects, \$4.6 million for technology projects, and \$600 thousand for parking lot expansion/repairs projects for a total of \$122.7 million.

**Table 4 - Capital Assets – Governmental Activities
As of June 30, 2026 and 2025**

	2026	2025
Land	\$ 40,093,533	\$ 40,093,533
Construction in progress	36,324,982	8,178,863
Buildings and improvements	2,133,798,653	2,096,287,601
Furniture and equipment	40,789,967	39,158,643
(Less accumulated depreciation)	(841,575,524)	(795,868,078)
Leased assets	6,188,640	6,356,473
Subscription assets	13,305,676	13,067,146
(Less accumulated amortization)	(7,363,913)	(6,285,675)
Total Capital Assets	\$ 1,421,562,014	\$ 1,400,988,506

Significant Long-Term Financing Activity

School systems in Maryland have no authority to incur bonded debt. The only long-term obligations of the HCPSS consist of lease obligations, subscription-based information technology arrangements, net pension and OPEB liabilities, compensated absences resulting from annual leave earned but not taken by employees, and workers compensation liabilities. The lease obligations were incurred for financing accounting and computer system upgrades.

Annual leave is earned on a monthly basis. At the end of the fiscal year, annual leave that has not been used can be carried over into the following year. At the end of any fiscal year, employee carryover is limited to the maximum amount, which is the lower of the stated amount in Policy 7110- Annual Leave for Administrative Personnel, or the amount outlined in the respective negotiated agreement. Accrued leave in excess of the carryover maximum is transferred to sick leave. Compensated absences totaled approximately \$15.8 million as of June 30, 2026. Net pension and OPEB liability totaled approximately \$75.9 million and \$765.0 million, respectively, as of June 30, 2026. Total long-term obligations totaled approximately \$875.8 million as of June 30, 2026 for a decrease of approximately \$75.7 million over the balance of \$951.5 million as of June 30, 2025.

Additional information on the School System's long-term obligation can be found on page [68](#) of this report.

Currently Known Facts, Decisions, and Conditions

Factors Influencing Future Budgets

The FY 2027 Approved Operating Budget advances the priorities outlined in the Strategic Plan with a clear recognition of the fiscal constraints confronting the school system. In a period marked by economic uncertainty, declining enrollment, rising operational costs, and significant preexisting financial commitments, the Operating Budget reflects the reality that prioritized decisions to allocate available resources define future budgets.

Management's Discussion & Analysis

These conditions fundamentally shaped the FY 2027 budget development strategy. Recognizing that future growth must be both intentional and sustainable, the Board will have to approach budget deliberations with a focus on prioritization and trade-offs. Each proposed investment required a corresponding assessment of what services could be maintained, scaled back, or eliminated. Rather than advancing a budget predicated on unattainable funding levels, this budget reflects a deliberate, multi-faceted approach designed to balance reasonable growth to meet system needs with fiscal responsibility.

The budget emphasizes maximizing and tactically repurposing certain existing positions and resources, prioritizing critical funding needs to advance student education, and making difficult decisions to reallocate resources through reductions to the base budget. In sum, the FY 2027 budget totals \$1.286 billion, representing a net increase of \$69.3 million, or 5.7 percent, over the current fiscal year. The budget adds a net change of 95.7 full-time equivalent (FTE) positions, a 1.1 percent increase compared to the current budget.

New budget investments total \$70.7 million, before base budget reductions, comprised of \$12.5 million in existing service commitments (net), \$52.4 million in employee compensation and benefits (net of a \$1.0 million benefit credit), \$7.0 million in Strategic Plan and other priorities, and a \$(1.3) million net reduction in one-time funding items.

The existing service commitments increase reflects growth in Special Education services (\$11.3 million, 64.1 FTE), bus contracts (\$5.5 million), and Blueprint Multilingual Learner and Prekindergarten expansion (\$3.8 million, 37.7 FTE), partially offset by a \$3.3 million reduction (32.6 FTE) from enrollment-driven staffing changes and an \$8.4 million net adjustment for year-over-year personnel cost timing. Priorities funding advances the Strategic Plan across all five focus areas, led by Strengthen Learning & Instruction (\$3.3 million) and Cultivate Student Belonging & Well-Being (\$1.5 million).

These additions were further reduced by \$1.3 million and 5.0 FTE positions in base budget reductions — the third consecutive year the base budget has been reduced to help offset rising costs — bringing the total net increase to \$69.3 million, or 5.7 percent, over the FY 2026 Approved Operating Budget. Additional detail on individual budget changes is presented in the FY 2027 Approved Operating Budget.

Economic Factors

The HCPSS will continue to face significant economic challenges in adopting a balanced budget that can maintain service levels. Challenges not unlike what the state and other school districts are faced with — budgetary challenges stemming from the confluence of multiple factors on both the revenue and expenditure sides of the budget.

- As HCPSS strives to meet the mandates of the Blueprint for Maryland's Future in coming years, the system will face challenges in fully funding the requirements without compromising other areas of the School System, particularly as the true financial impact of the mandates unfolds.
- Due to the ongoing reorganization of the U.S. Department of Education (USDE), there is increased uncertainty pertaining to federal grant awards.
- Labor markets remain tight influencing the need to maintain compensation growth to attract and retain the best talent.
- Inflationary pressure, affecting all areas of the system, including labor, health insurance, student transportation, capital projects, and purchases of tangible and intangible school equipment and supplies.
- Student enrollment numbers have stagnated. Required revenues are declining as enrollment sensitive funding formulas are primarily responding to a number count and not the economic reality of increasing costs. Additionally, HCPSS has seen an increasing proportion of students who struggle with poverty, mental health issues, language barriers, and other challenges, which has necessitated an increase in costs pertaining to addressing their specific needs.

Management's Discussion & Analysis

- As healthcare costs, including prescription plans, continue to escalate, HCPSS's share of expenses also continues to disproportionately increase.
- HCPSS outsources all transportation contracts. As the industry continues to face large shortages in attracting and maintaining labor, there have been significant cost increases in meeting the School System's needs.

HCPSS, which has managed through structural deficits the last few budgets with one-time funds, faces a starker outlook of declining revenues and increasing costs with diminished fund balances to help manage the impacts on services. This left the School System's budget at a crossroads with a need to increase revenues and decrease costs to close the deficit.

These factors were considered in preparing the HCPSS budget for FY 2027.

Contacting HCPSS Financial Management

This financial report is designed to provide our citizens, taxpayers, and creditors with a general overview of the HCPSS finances and to show accountability for the money it receives. If you have any questions about this report or need additional financial information, please contact:

Government-Wide Financial Statements

Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position June 30, 2026

TOTAL FUND BALANCES - GOVERNMENTAL FUNDS (page 45)	\$	72,719,938
Amounts reported for governmental activities in the Statement of Net Position is different because:		
Capital assets used in governmental activities are not financial resources and therefore, are not reported as assets in governmental funds. The cost of these assets is \$2,258,325,047 and the accumulated depreciation is \$839,439,487.		1,418,885,560
Internal service funds are used by the Board to account for printing and duplicating services, data processing services, workers compensation self-insurance services activities, and health and dental self-insurance activities. The assets and liabilities of the internal service funds are included with governmental activities.		29,308,989
Deferred outflows of resources related to pensions that relate to future periods therefore not reported at the fund level.		28,426,125
Deferred outflows of resources related to OPEB that relate to future periods therefore not reported at the fund level.		345,999,525
Deferred inflows of resources related to pensions that relate to future periods therefore not reported at the fund level.		(1,191,507)
Deferred inflows of resources related to OPEB that relate to future periods therefore not reported at the fund level.		(590,551,310)
Long-term liabilities are not due and payable in the current period and therefore are not reported as liabilities in governmental funds. Long-term liabilities at year-end consist of \$15,304,932 of compensated absences payable, \$2,327,748 of lease liabilities, \$7,088,107 of subscription-based information technology arrangement liabilities, \$75,904,494 of net pension liability, and \$764,997,115 of net OPEB liability.		(865,622,396)
TOTAL NET POSITION - GOVERNMENTAL ACTIVITIES (page 44)	\$	437,974,924

These financial statements should be read only in connection with the accompanying summary of significant accounting policies and notes to financial statements

Government-Wide Financial Statements

Reconciliation of the Governmental Funds Statement of Revenues, Expenditures, and Changes in Fund Balances to the Statement of Activities Year Ended June 30, 2026

TOTAL NET CHANGE IN FUND BALANCES - GOVERNMENTAL FUNDS (page 47)	\$ 4,905,276
Amounts reported for governmental activities in the Statement of Activities are different because:	
Capital outlays are reported in governmental funds as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation and amortization expense. This is the amount by which capital outlay of \$67,682,300 exceeds depreciation and amortization expense of \$48,833,711 in the period.	18,848,589
The issuance of lease obligations in the amount of \$719,969 provides current financial resources to governmental funds, while the repayment of the principal of lease obligations in the amount of \$672,258 consumes the current financial resources of governmental funds.	(47,711)
The issuance of subscription-based information technology agreements (SBITAs) obligations provides \$0 current financial resources to governmental funds, while the repayment of the principal of SBITA obligations in the amount of \$2,165,456 consumes the current financial resources of governmental funds.	2,165,456
In the Statement of Activities, compensated absences are measured by the amounts earned during the year. In the governmental funds, however, expenditures for compensated absences are measured by the amount of financial resources used (essentially, the amounts actually paid or expected to be paid within one year). This year, vacation and sick leave used were less than the amounts earned:	(384,465)
Governmental funds report pension contributions as expenditures. However, in the Statement of Activities, the cost of the pension benefits earned net of employer contributions is reported as pension income (expense).	(2,235,604)
Governmental funds report OPEB contributions as expenditures. However, in the Statement of Activities, the cost of the OPEB earned net of employer contributions is reported as OPEB income (expense).	17,750,709
Internal service funds are used by the Board to account for printing and duplicating services, data processing services, workers' compensation self-insurance activities, and health and dental self-insurance activities. The change in the net position of the internal service fund is reported with governmental activities.	3,077,628
CHANGES IN NET POSITION OF GOVERNMENTAL ACTIVITIES (page 44)	\$ 44,079,878

These financial statements should be read only in connection with the accompanying summary of significant accounting policies and notes to financial statements

I - Summary of Significant Accounting Policies

Financial Reporting Entity

Howard County Public School System (the School System or HCPSS) is a body politic and corporate established by the Public School Laws of Maryland. For financial reporting purposes, the School System is a component unit of Howard County, Maryland (the County) by virtue of the County's responsibility for levying taxes and incurring debt for the benefit of the School System and its budgetary control over the School System.

Accordingly, the financial statements of HCPSS are included in the financial statements of the County. The School System itself has no component units.

The accounting policies of HCPSS conform to accounting policies generally accepted in the United States for governmental units. The following is a summary of the significant policies employed by the School System.

Government-Wide and Fund Financial Statements

The Statement of Net Position and the Statement of Activities report information on all of the non-fiduciary activities of the School System as a whole. For the most part, the effect of inter-fund activity has been removed from these statements. The activities of the General Fund, Food Services Fund – a special revenue fund, Glenelg Wastewater Treatment Plant – a special revenue fund, Restricted Programs Fund – a special revenue fund, Capital Projects Fund and Internal Service Funds have been presented as governmental activities in the government-wide financial statements.

The activities of the Enterprise Fund have been presented as business- type activities in those statements because a majority of these fund revenues come from charges for services.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Direct expenses are those that are specifically associated with a service, program or department and are clearly identifiable to a particular function. Program revenues include charges paid by the recipient of the goods or services offered by the program and grants and contributions that are restricted to meeting the operational requirements of a particular program. Local appropriations, state and federal aid and other items which are not classified as program revenues are presented as general revenues of the School System.

Separate financial statements are provided for governmental funds and proprietary funds. All individual governmental funds are reported as separate columns in the governmental fund financial statements for major and nonmajor funds.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Local appropriations and state and federal aid are recognized as revenues in the year for which they were approved by the provider. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

Notes to the Basic Financial Statements

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the School System considers revenues to be available if they are collectible within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, expenditures related to certain compensated absences and leases are recognized when the obligations are due and payable. Local appropriations and state and federal aid associated with the current fiscal period are considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Entitlements and shared revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria have been met. Expenditure-driven grants are recognized as revenues when the qualifying expenditures have been incurred and all other grant requirements have been met.

Governmental Funds

The School System reports the following major funds in the fund financial statements:

- **General Fund** –The General Fund is the general operating fund of the School System. It is used to account for all financial resources except those required to be accounted for in another fund.
- **Restricted Programs Fund (Special Revenue Fund)** – The Restricted Programs Fund is used to account for restricted grants issued primarily by county, state, and federal governmental agencies, “S-Programs” which support specific programs and school activity funds.

The School System elects to report the following nonmajor funds in the fund financial statements due to the importance of these funds to the HCPSS Community and other financial statement users:

- **Food Services Fund (Special Revenue Fund)** – The Food Services Fund is used to account for the operations of cafeterias and the production facility, which provides for the preparation and sale of meals primarily to students. As a special revenue fund, the proceeds of specific revenue sources (other than major capital projects) are legally restricted to expenditures for specified purposes.
- **Glenelg Wastewater Treatment Plant Fund (Special Revenue Fund)** – The Glenelg Wastewater Treatment Plant Fund is used to account for the operations of the shared wastewater treatment facility at Glenelg High School, which provides wastewater treatment services to Glenelg High School and the Musgrove Farm community of 30 home sites located on the adjoining property. The proceeds of specific revenue sources (other than major capital projects) are legally restricted to expenditures for specified purposes.
- **Capital Projects Fund** – The Capital Projects Fund is used to account for financial resources to be used for the acquisition or construction of major capital facilities.

Proprietary Funds

Proprietary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting used in the government-wide financial statements.

- **Enterprise Fund** – The enterprise fund is used to account for operations that are financed and operated in a manner similar to private business enterprises—where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges. The Jim Rouse Theatre Fund is reported as an enterprise fund.
- **Internal Service Funds** – Internal service funds are used to account for the costs of maintaining the School System’s self-insured programs for health, dental, and workers’ compensation benefits for its employees and to account for the costs of print and technology services.

Notes to the Basic Financial Statements

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operation. The principal operating revenues for the internal service funds are premium contributions to the health and dental self-insurance-fund and the workers' compensation fund. Operating revenues for the enterprise fund, Jim Rouse Theatre, are received primarily from ticket sales. Operating expenses for the internal service funds as well as the enterprise fund cover the cost of providing these services, including administrative, claim and related payments and depreciation. All other revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

In the process of aggregating data for the Statement of Net Position and the Statement of Activities, some amounts reported as interfund activity and balances in the funds were eliminated and reclassified. Interfund receivables and payables were eliminated to minimize the "grossing up" effect on assets and liabilities within the governmental activities.

Assets and liabilities of internal service funds are included in governmental activities in the Statement of Net Position. The effect of inter-fund services provided and used between functions have been eliminated in the Statement of Activities, so that only the net amount is included in the governmental activities' column.

Deposits and Investments

The School System maintains pooled and various separate cash accounts for its funds. The cash balances of the School Fund consist of individual demand accounts maintained by the schools. Investments are stated at amortized cost, which approximates fair value due to the short-term nature of those investments. The School System considers any instrument with a maturity of three months or less when purchased, as cash equivalents.

Due from Other Units of Government and Other Receivables

Accounts receivable in all funds represent amounts that have arisen in the ordinary course of business and are stated net of allowances for uncollectible amounts. Governmental fund type receivables consist primarily of amounts due from county, state, or federal governments and from other Maryland Public School Systems. These intergovernmental receivables are generally collected within 90 days of the end of the fiscal year. Certain intergovernmental receivables may extend up to one year from the end of the fiscal year. Uncollectible amounts as of June 30, 2026 are expected to be minimal based upon collection experience and review of the status of existing receivables.

Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position/ Fund Balance

Inventory and Prepaid Items

Inventory in the General Fund consists of parts and supplies maintained in the warehouse, which is reported at cost using the weighted average cost basis. In FY 2024, the system significantly reduced the number of items it maintains centrally, in favor of just in time inventory purchases by individual schools and departments. Items maintained are now limited to paper and specific types of furniture. Inventory in the Food Services Fund consists of expendable food and supplies held for consumption which is reported at the lower of cost or market. The cost is recorded as an asset at the time individual inventory items are purchased. As inventory is consumed, the cost is charged to expenditures.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements. Prepaid expenses in the general fund and internal service funds consist of insurance premiums and other administrative expenditures that relate to fiscal year 2027. Prepaid expenses are accounted for in accordance with the consumption method.

Notes to the Basic Financial Statements

Capital Assets

Capital assets, which include property, plant, equipment and infrastructure assets, are reported in the governmental activities and business-type activities columns in the government-wide financial statements. Capital assets are defined by the School System as assets with an initial, individual cost of more than \$5,000 and a useful life of at least five years. Capital assets are recorded at historical cost or estimated historical cost if actual historical cost is not available. Donated capital assets are valued at their acquisition value on the date donated. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Property, plant and equipment are depreciated using the straight-line method over estimated useful lives of 20–45 years for buildings, improvements and infrastructure, and 5–15 years for furniture and equipment.

Assets which have been acquired with funds received through federal grants must be used in accordance with the terms of the grant. Federal regulations require, in some cases, that the School System must reimburse the federal government for any assets which the School System retains for its own use after the termination of the grant unless otherwise provided by the grantor.

Leases and Subscription-Based Information Technology Agreements

Leases and Subscription-based information technology agreements (SBITAs) are for the right-to use software licenses that exceed 12 months and have an annual fixed subscription cost of more than \$5,000. These assets are reported under the appropriate governmental or business-type activities columns in the government-wide financial statements. Leases or SBITAs are reported at the present value of the expected payments plus any initial implementation stage costs necessary to place the asset into service. Subscription assets are amortized over the life of the agreement using the straight-line method. Amortization expenses are reflected in both the government-wide and proprietary fund financial statements.

Estimated useful lives for leases and SBITAs are determined based on the shorter of the asset's useful life or the lease/subscription term, including any reasonably certain renewal options. Useful lives typically range from 3 to 10 years, depending on the nature of the underlying asset or subscription.

Lease and SBITAs' assets are reported as separate line items under capital assets. Lease and SBITAs' liabilities are reported under long-term liabilities. Amortization of these assets is recorded on a straight-line basis over the determined useful life and is reported as depreciation expense for lease assets or amortization expense for SBITA assets.

Assets and liabilities arising from a lease and/or a subscription-based agreement are initially measured on a present value basis. Lease and subscription-based liabilities include the net present value of the following payments:

- fixed payments (including in-substance fixed payments), less any lease and subscription-based agreement incentives receivable;
- amounts expected to be payable by HCPSS under residual value guarantees;
- the exercise price of a purchase option if the group is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease or subscription-based agreement, if the term reflects the system's exercising that option.

The lease and subscription-based payments are discounted using the interest rate implicit in the contract agreements. If that rate cannot be readily determined, the School System's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

Notes to the Basic Financial Statements

Unearned Revenue

For the General Fund, unearned revenue consists of summer school tuition which is collected in advance and unearned since the corresponding services have not been provided and the earnings process is not completed until the following fiscal year.

For the Restricted Programs Fund and Capital Projects Fund, unearned revenue consists of cash received under cost-reimbursement based programs in excess of the expenditures under those programs on June 30, 2026.

Student meal sales consist of payments and prepayments may be made using cash or check. Families may also prepay with a credit card by setting up an online account to pay for student meals. Unearned revenue in the Food Services Fund consists primarily of these funds held on account for student meals.

For the Glenelg Wastewater Treatment Plant Fund, homeowners are assessed after service periods; however, in unique situations where assessment fees are collected in advance, they are recorded as unearned revenue since the corresponding services have not been provided and the earnings process is not completed until the following fiscal year.

For the Internal Service Funds, unearned revenue consists of payroll withholdings from employees for health and dental insurance collected in advance as of June 30, 2026 for the first three months of fiscal year 2027.

Deferred Outflow and Inflow of Resources

A deferred outflow of resources represents a consumption of net assets that applies to a future period and so will not be recognized as an outflow of resources (expense/expenditure) until the future period. The School System recognizes deferred outflows related to changes in assumptions for pension and OPEB, the difference between expected and actual experience related to OPEB, changes in the School System's proportionate share of the pension and OPEB liability, the net difference between the projected and actual investment earnings on pension and OPEB plan investments, the difference between actual and proportionate share of pension contributions and contributions subsequent to the measurement date related to pension and OPEB plans.

A deferred inflow of resources represents an acquisition of net assets that applies to a future period and so will not be recognized as an inflow of resources (revenue) until the future period. The School System recognizes deferred inflows related to the changes in assumptions for pension and OPEB, changes in the School System's proportionate share of the pension and OPEB liability, the difference between expected and actual experience related to pensions and OPEB, and the net difference between the projected and actual investment earnings on OPEB investments.

Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about fiduciary net position of the Maryland State Retirement and Pension System (System) and additions to/deductions from the System's fiduciary net position have been determined on the same basis as they are reported by the System. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Postemployment Benefits Other Than Pensions (OPEB)

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Other Postemployment Benefit (OPEB) Trust Fund (Trust) and additions to/deductions from the Trust's fiduciary net position have been determined on the same basis as they are reported by the Trust. For this purpose, the Trust recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

Notes to the Basic Financial Statements

Compensated Absences

It is the School System's policy to permit employees to accumulate earned but unused vacation, personal, and sick pay benefits. At the end of the fiscal year, personal leave in excess of the maximum carryover per negotiated agreement can be transitioned to sick leave. All vacation pay is accrued when incurred in the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured as a result of employee resignations and retirements.

Beginning in FY 2025 and in accordance with GASB 101, Compensated Absences, the School System performs an analysis comparing available sick and personal leave to the average of the past three years of annual usage per bargaining unit. As the total sick leave usage in the audit fiscal year was less than the three-year average of annual leave earned using the first-in, first-out (FIFO) method, no additional liability was recorded.

Net Position / Fund Balance

Net position represents the difference between assets and deferred outflows and liabilities and deferred inflows. Net investment in capital assets consists of capital assets, net of accumulated depreciation, accumulated amortization and the liabilities associated with leased right-of-use assets and subscription-based information technology arrangements. Under state law, the School System is prohibited from incurring debt to finance the acquisition of capital assets, except for those assets purchased under lease agreements and subscription-based information technology agreements. Major capital projects are financed through local and state aid with applicable debt recorded by Howard County and the State of Maryland. Net position is reported as restricted when there are limitations placed on their use through external restrictions imposed by grantors or laws or regulations of other governments. When both restricted and unrestricted resources are available for use, restricted resources shall be used first and then unrestricted resources as they are needed.

The School System reports fund balance of governmental funds within one of the fund balance categories listed below:

- **Nonspendable** – This classification includes amounts that cannot be spent because they are either (a) not in spendable form or (b) are legally or contractually required to be maintained intact.
- **Restricted** – Amounts that can be spent only for specific purposes because of constitutional provisions or enabling legislation or because of constraints that are externally imposed by creditors, grantors, contributors, or the laws or regulations of other governments.
- **Committed** – Amounts that can be used only for specific purposes as determined by a formal action of the Board, the highest level of decision-making authority for the School System. Commitments may be established, modified, or rescinded only through formal actions consisting of resolutions approved by the Board.
- **Assigned** – Amounts that do not meet the criteria to be classified as restricted or committed but that are intended to be used for specific purposes. This intent can be expressed by the Board or through their delegating this responsibility to the Superintendent's budgetary process.
- **Unassigned** – All other spendable amounts. This is the residual classification for the General fund and other governmental funds. The General Fund is the only fund that reports a positive unassigned fund balance amount. If expenditures incurred for specific purposes exceeded the amounts restricted, committed, or assigned for these purposes, it may be necessary to report a negative unassigned fund balance.

Policy 4070, Fund Balance, states in what order fund balance categories are spent: (1) Nonspendable balance first, then (2) restricted fund balance, then (3) committed fund balance, then (4) assigned fund balance, and (5) unassigned fund balance.

Notes to the Basic Financial Statements

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the School System considers restricted funds to have been spent first. When an expenditure is incurred for which committed, assigned, or unassigned fund balances are available, the School System considers amounts to have been spent first out of committed funds, then assigned funds, and finally unassigned funds, as needed, unless the Board has stated otherwise in its commitment or assignment actions.

Budgets and Budgetary Accounting

Budgetary compliance is measured using the budgetary basis of accounting, the purpose of which is to demonstrate compliance with the legal requirements of the County and the State of Maryland. The budgetary basis differs from GAAP, which is used for the fund financial statements, in that encumbrances, which represent commitments to purchase goods and services, are treated as expenditures of the current period rather than as reservations of the fund balance.

In addition, pension contributions made by the State of Maryland on behalf of the School System and OPEB contributions made by the Howard County Government on behalf of the School System are excluded from the budgetary basis. Another difference is that under the budgetary basis, designations of the prior year's fund balance are treated as revenue of the current period. The general fund budgetary basis schedules of revenues and expenditures and encumbrances, budget and actual, and a reconciliation to the fund financial statements are presented as required supplementary information to these financial statements. By state law, major categories of expenditures may not exceed budgeted amounts.

The School System follows these procedures in establishing the budgetary data reflected in the financial statements:

Operating Budget (General Fund)

- 1) A discussion guide for the following fiscal year's operating budget is published annually.
- 2) A public hearing is held in January and February to receive budget requests from individuals and community groups.
- 3) The proposed budget is made available to the public and the County Government in January.
- 4) Public hearings are held to obtain comments from the community.
- 5) The final proposed operating budget is submitted to the County Executive on or after March 1 as may be requested by the county fiscal authority, per state law.
- 6) After approval or adjustment by the County Council, the final operating budget is approved by the School System in June.
- 7) Budgets are adopted on a basis consistent with GAAP except for the inclusion of portions of the prior year's fund balance as revenues, the inclusion of encumbrances as expenditures, the exclusion of pension contributions made on the School System's behalf by the State of Maryland, and the OPEB contributions made on behalf of the School System by the County as both revenues and expenditures. Budget comparisons presented are on a non-GAAP budgetary basis.
- 8) Transfers may be made within the major categories by the School System without the approval of the Board of Education and the County Council.
- 9) Requests for transfers between major categories must be approved by the Board of Education and submitted to the County Council for approval or denial. No action within thirty (30) days of submission constitutes approval.
- 10) The legal level of budgetary control (i.e., the level at which expenditures may not legally exceed appropriations) is the State Category level.

Notes to the Basic Financial Statements

Operating Budget (Restricted Programs Fund)

This budget is not legally adopted. The Restricted Programs Fund accounts for revenue and expenditures under special state and federal programs as well as school activity accounts maintained by individual schools. Management estimates expected revenues and expenditures but there is not a legally adopted budget, and actual expenditures may exceed budgeted amounts. The grants included in this category are not part of budget categories subject to spending limitations of the operating budget. Expenditures under these programs are limited to the amounts of the respective grants. The comparison of the Restricted Programs Fund (a special revenue fund) operating budget to actual revenues and expenditures is not presented as required supplementary information because this budget is developed internally by the School System for management purposes only.

Operating Budget (Food Services Fund)

This budget is not legally adopted. The comparison of the Food Services Fund (a special revenue fund) operating budget to actual revenues and expenditures is not presented as required supplementary information because this budget is developed internally by the School System for management purposes only.

Operating Budget (Glenelg Wastewater Treatment Plant Fund)

This budget is not legally adopted. The comparison of the Glenelg Wastewater Treatment Plant Fund (a special revenue fund) operating budget to actual revenues and expenditures is not presented as required supplementary information because this budget is developed internally by the School System for management purposes only.

Operating Budget (Jim Rouse Theatre Fund)

This budget is not legally adopted. The Enterprise Fund accounts for revenue and expenditures relative to the Jim Rouse Theatre Fund. The operating budget to actual revenues and expenditures is not presented as required supplementary information because this budget is developed internally by the School System for management purposes only.

Use of Estimates in Preparing Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

New Pronouncements

The Board has adopted Statement No. 103, Financial Reporting Model Improvements. The requirements of this Statement are effective for fiscal years beginning after June 15, 2025, and have been implemented for the fiscal year ended June 30, 2026. Implementation resulted in changes to the presentation of the government-wide and fund financial statements, including the separate display of unusual or infrequent items in the Statement of Activities and fund financial statements. There was no material impact on the School System's reported financial position or results of operations.

The Board has adopted Statement No. 104, Disclosure of Certain Capital Assets. The requirements of this Statement are effective for fiscal years beginning after June 15, 2025, and have been implemented for the fiscal year ended June 30, 2026. Implementation resulted in additional note disclosures related to capital assets restricted by external parties, capital assets held for sale, and capital assets associated with service concession arrangements or public-private partnerships (see Note III). There was no material impact on the School System's reported financial position or results of operations.

GASB has issued Statement No. 105, Subsequent Events. The requirements of this Statement are effective for fiscal years beginning after June 15, 2026. The Board is currently evaluating the effect of implementation of this Statement.

Notes to the Basic Financial Statements

II - Cash and Cash Equivalents and Investments

Deposits

As of June 30, 2026, the carrying amount of the School System's deposits was \$47,563,582 in the governmental funds and the corresponding bank balances were \$50,477,604. Bank balances were covered by either Federal Depository Insurance for \$250,000 or collateral held in the pledging bank's trust department in the School System's name in the amount of \$52,680,458. The School System has a contractual arrangement with a bank for funds to be transferred daily from overnight investments to cover checks as presented.

Investments

As of June 30, 2026, the School System's investments totaling \$155,611,581 in Governmental and Business-type activities were entirely in the Maryland Local Government Investment Pool (MLGIP), which is under the administration of the State Treasurer. The MLGIP was established under the Annotated Code of Maryland and is rated AAAM by Standard and Poor's, their highest rating for money market funds. MLGIP is a 2a7 like pool, which is not registered with the Securities and Exchange Commission (SEC), but generally operates in a manner consistent with the SEC's Rule 2a7 of the Investment Company Act of 1940 (Rule 2a7). Unit value is computed using the amortized cost method and maintains a \$1 per share value.

Interest Rate Risk

Fair value fluctuates with interest rates and increasing rates could cause fair value to decline below the original cost. To limit the School System's exposure to interest rate risk, the School System's investment policy limits the term of investment maturities other than the Fiduciary Funds to overnight repurchase agreements and MLGIP and requires that collateral securities underlying the re-purchase agreements and MLGIP have a market value equal to the cost of the agreement. The average maturity of the investments in the MLGIP investment pool is less than one year. Total net investment income per the Statement of Activities consists of interest income of \$6,806,385 for the year ended June 30, 2026.

Custodial Credit Risk

For an investment, custodial credit risk is the risk that, in the event of failure of the counter party, the School System will not be able to recover all or a portion of its investments or collateral securities that are in the possession of an outside party. The School System's investment policy limits its investments to overnight deposits that are insured or collateralized with securities held by a custodian in the School System's name and investments in the MLGIP.

Statutes require that deposits be in Maryland banks and that uninsured deposits be fully collateralized and authorize the School System to invest in obligations of the United States government, federal agency obligations and repurchase agreements secured by direct government or agency obligations.

Notes to the Basic Financial Statements

III - Capital Assets

Capital asset activity for the year ended June 30, 2026 was as follows:

Governmental Activities	Balance July 1, 2025	Increases	Decreases/ Reclassifications	Balance June 30, 2026
Nondepreciable capital assets				
Land	\$ 40,093,533	\$ —	\$ —	\$ 40,093,533
Construction in progress	8,178,863	65,657,171	(37,511,052)	36,324,982
Total nondepreciable capital assets	48,272,396	65,657,171	(37,511,052)	76,418,515
Capital assets being depreciated				
Land improvements	1,675,226	—	—	1,675,226

Certain capital assets are subject to external restrictions. See Restricted Capital Assets disclosure below.

Notes to the Basic Financial Statements

Depreciation and amortization expense for the year ended June 30, 2026 was charged to Governmental activities on the Statement of Activities as follows:

Instruction:

Regular education	\$ 42,145,328
Special education	107,141

Support services:

Administration	1,123,760
Mid-level administration	3,019,242
Student transportation	2,440
Operation and maintenance of plant	3,388,294
Community services	87,288
Food services	172,029

Total depreciation and amortization expense	\$ 50,045,522
--	----------------------

Internal service funds depreciation	\$ 1,211,812
Governmental funds depreciation	48,833,710

Total Governmental Activities Depreciation	\$ 50,045,522
---	----------------------

	Balance July 1, 2025	Increases	Decreases/ Reclassifications	Balance June 30, 2026

Less accumulated depreciation	(281,607)	(23,685)	—	(305,292)
Capital assets, net	\$ 63,421	\$ 25,215	\$ —	\$ 88,636

Restricted Capital Assets (GASB 104 – New Disclosure)

Certain capital assets of the HCPSS are subject to external restrictions on their use. These restrictions are primarily associated with assets acquired or constructed using grant funding and school construction funding provided by state and local sources.

Capital assets funded through these sources are restricted for educational and programmatic purposes in accordance with applicable grant agreements, statutory requirements, and funding provisions. These restrictions generally require that the capital assets be used for their intended educational purposes for the duration specified by the funding agreements or applicable regulations.

As of June 30, 2026, restricted capital assets were associated with the following funding sources:

- Grant-funded capital assets - \$819,668
- School construction funded capital assets - \$1,032,385,851

The HCPSS monitors compliance with these restrictions as part of its capital asset management and grant compliance processes.

Capital Assets Held for Sale (GASB 104 – Required Disclosure)

The Howard County Public School System evaluates capital assets for potential classification as held for sale in accordance with GASB Statement No. 104, Disclosure of Certain Capital Assets.

Notes to the Basic Financial Statements

As of June 30, 2026, the HCPSS had no capital assets classified as held for sale.

Capital Assets Associated with Service Concession Arrangements or Public-Private Partnerships (GASB 104 – Required Disclosure)

The Howard County Public School System did not have any capital assets associated with service concession arrangements or public-private partnerships as of June 30, 2026.

Active School Construction Projects

The School System has active school construction projects as of June 30, 2026 as follows:

	<u>Spent to Date</u>	<u>Remaining Commitment</u>
Project:		
Oakland Mills MS Reno/Add	\$ 19,943,421	\$ 22,097,579
Planning and Design	3,447,123	1,202,877
Systemic Renovations FY19 Forward	84,582,998	10,362,982
Roofing Projects FY19 Forward	16,487,321	4,090,437
Technology FY19 Forward	14,987,591	12,021,409
Dunloggin MS Reno/Add	2,370,497	8,807,503
Systemic Renovations FY24 Forward	34,066,097	104,245,631
Roofing Projects FY24 Forward	942,485	18,054,145
Faulkner Ridge Center	2,494,523	24,061,477
Applications and Research Lab Reno	10,303,408	3,696,592
Subtotal	<u>189,625,464</u>	<u>208,640,632</u>
Other Projects	<u>254,043,727</u>	<u>7,196,452</u>
Total	<u><u>\$ 443,669,191</u></u>	<u><u>\$ 215,837,084</u></u>

These projects were primarily funded through capital grants from the County and the State of Maryland, prior to commitments being made with contractors.

Notes to the Basic Financial Statements

IV - Due To/Due From Other Funds

The composition of inter-fund balances as of June 30, 2026 is as follows:

Receivable Fund	Payable Fund	Purpose	Amount
Workers Compensation	General	Reimbursable expenditures	\$ 6,333,664
Capital Projects	General	Reimbursable expenditures	17,924,131
Technology Services	General	Reimbursable expenditures	16,171,283
Health and Dental	General	Reimbursable expenditures	27,715,711
Jim Rouse Theatre	General	Reimbursable expenditures	—
Print Services	General	Reimbursable expenditures	333,816
General	Glenelg WWTP	Treatment plant expenditures	143,277
General	Restricted Programs	Advances of pooled cash	3,952,690
General	Food Services	Food services expenditures	2,903,789
Total			\$ 75,478,361

These inter-fund balances are presented in the accompanying financial statements as follows:

	Due To	Due From
Balance Sheet - Governmental Funds (page 45)	\$ 75,478,361	\$ 24,923,887
Statement of Net Position - Proprietary Funds (page 49)	—	—
Statement of Net Position - Internal Service Funds (page 100)	—	50,554,474
Total	\$ 75,478,361	\$ 75,478,361

Activity between funds represents expenditures paid by the General Fund on behalf of another fund or amounts received by the General Fund on behalf of another fund. All operating cash is processed through the General Fund and accounted for on each fund as due to/from the General Fund.

The School System does not have any long-term advances of inter-fund loans, and all inter-fund activity is considered current activity. Inter-fund activity consists primarily of advances from the General Fund to other funds to cover temporary cash needs. These situations arise because many grants and capital projects are reimbursed to the School System by the granting government after the School System has incurred the expenditure.

Notes to the Basic Financial Statements

V - Long-Term Liabilities

Compensated absences, pension liabilities and other post-employment liabilities are generally liquidated by the General Fund.

	Balance July 1, 2025	Increases	Decreases	Balance June 30, 2026	Due Within One Year
Compensated absences	\$ 15,364,592	\$ 1,406,630	\$ (946,884)	\$ 15,824,338	\$ 800,000
Leases	2,586,762	2,238,183	(1,108,748)	3,716,197	1,041,801
Subscription agreements	9,253,563	1,219,801	(2,484,154)	7,989,210	2,552,602
Net pension liability	75,806,450	98,044	—	75,904,494	—
Net OPEB liability	842,237,563	—	(77,240,448)	764,997,115	—
Workers compensation	6,260,156	6,389,831	(5,297,047)	7,352,940	4,905,953
Total governmental activities	\$ 951,509,086	\$ 11,352,489	\$ (87,077,281)	\$ 875,784,294	\$ 9,300,356

The School System has entered into several leases and subscription-based information technology arrangements as lessee to finance the purchase of student information system, data warehouse, learning management system, and enterprise resources that expire at various times through FY 2031.

The future minimum lease obligations as of June 30, 2026 were as follows:

Years Ending June 30:	Leases		
	Principal Payments	Interest Payments	Total Payments
2027	\$ 1,041,801	\$ 116,095	\$ 1,157,896
2028	1,013,647	81,914	1,095,561
2029	820,090	51,156	871,246
2030	739,489	22,769	762,258
2031	101,170	1,790	102,960
	\$ 3,716,197	\$ 273,724	\$ 3,989,921

The future minimum obligations under subscription-based information technology arrangements as of June 30, 2026 were as follows:

Years Ending June 30:	Subscription Agreements		
	Principal Payments	Interest Payments	Total Payments
2027	\$ 2,552,602	\$ 277,424	\$ 2,830,026
2028	2,661,683	188,803	2,850,486
2029	2,774,925	96,641	2,871,566
2030	—	—	—
2031	—	—	—
	\$ 7,989,210	\$ 562,868	\$ 8,552,078

VI - Defined Benefit Pension Plans

General Information about the Plan

Plan Description

The employees of the HCPSS are covered by the Maryland State Retirement and Pension System (the System), which is a cost sharing employer public employee retirement system. While there are five retirement and pension systems under the System, employees of the HCPSS are a member of either the Teachers' Retirement and Pension Systems or the Employees' Retirement and Pension Systems. The System was established by the State Personnel and Pensions Article of the Annotated Code of Maryland to provide retirement allowances and other benefits to State employees, teachers, police, judges, legislators, and employees of participating governmental units. The Plans are administered by the State Retirement Agency. Responsibility for the System's administration and operation is vested in a 15-member Board of Trustees. The System issues a publicly available financial report that can be obtained at <http://www.sra.state.md.us>.

Benefits Provided

The System provides retirement allowances and other benefits to State teachers and employees of participating governmental units, among others. For individuals who become members of the Teachers' Retirement and Pension Systems and the Employees' Retirement and Pension Systems on or before June 30, 2011 retirement/pension allowances are computed using both the highest three years Average Final Compensation (AFC) and the actual number of years of accumulated creditable service. For individuals who become members of the Teachers' Pension System and Employees' Pension System on or after July 1, 2011 pension allowances are computed using both the highest five years AFC and the actual number of years of accumulated creditable service. Various retirement options are available under each system which ultimately determines how a retiree's benefits allowance will be computed. Some of these options require actuarial reductions based on the retiree's and/or designated beneficiary's attained age and similar actuarial factors.

A member of either the Teachers' or Employees' Retirement System is generally eligible for full retirement benefits upon the earlier of attaining age 60 or accumulating 30 years of creditable service regardless of age. The annual retirement allowance equals $\frac{1}{55}$ (1.81%) of the member's average final compensation (AFC) multiplied by the number of years of accumulated creditable service.

A member of either the Teachers' or Employees' Pension System on or before June 30, 2011 is eligible for full retirement benefits upon the earlier of attaining age 62, with specified years of eligibility service, or accumulating 30 years of eligibility service regardless of age. An individual who becomes a member of either the Teachers' or Employees' Pension System on or after July 1, 2011 is eligible for full retirement benefits if the members' combined age and eligibility service equals at least 90 years or if the member is at least age 65 and has accrued at least 10 years of eligibility service.

For most individuals who retired from either the Teachers' or Employees' Pension System on or before June 30, 2006, the annual pension allowance equals 1.2% of the member's AFC, multiplied by the number of years of creditable service accumulated prior to July 1, 1998, plus 1.4% of the member's AFC, multiplied by the number of years of creditable service accumulated subsequent to June 30, 1998. With certain exceptions, for individuals who are members of the Teachers' or Employees' Pension System on or after July 1, 2006, the annual pension allowance equals 1.2% of the member's AFC, multiplied by the number of years of creditable service accumulated prior to July 1, 1998, plus 1.8% of the member's AFC, multiplied by the number of years of creditable service accumulated subsequent to June 30, 1998. Beginning on July 1, 2011, any new member of the Teachers' or Employees' Pension System shall earn an annual pension allowance equal to 1.5% of the member's AFC multiplied by the number of years of creditable service accumulated as a member of the Teachers' or Employees' Pension System.

Notes to the Basic Financial Statements

Contributions

The HCPSS and covered members are required by state statute to contribute to the System. Members of the Teachers' Pension System and Employees' Pension System are required to contribute 7% of earnable compensation annually. Members of the Teachers' Retirement System and Employees' Retirement System are required to contribute 5-7% of earnable compensation annually, depending on the retirement option selected. The contribution requirements of the System members, as well as the state and participating governmental employers are established and may be amended by the Board of Trustees for the System.

The state makes a substantial portion of the HCPSS's annual required contribution to the Teachers' Retirement and Pension Systems on behalf of the HCPSS. The state's contribution on behalf of the HCPSS for the year ended June 30, 2026 was \$73,173,090. The contribution made by the state on behalf of the HCPSS have been included as both revenues and expenditures in the General Fund in the accompanying Statement of Revenues, Expenditures, and Changes in Fund Balances and are also included as revenues and expenses in the Statement of Activities.

Beginning in FY 2013, the State of Maryland General Assembly passed a bill that required the Boards of Education in Maryland to begin paying the normal cost for their teachers into the Teachers' Retirement and Pension Systems. The legislation structured this as a four-year phase-in to the full normal cost so that 50% was paid in FY 2013. Full normal cost commenced being paid in FY 2020. The HCPSS's required contribution to the Teachers' Retirement and Pension Systems for the year ended June 30, 2026 was \$32,695,159.

The HCPSS's contractually required contribution rate for the Employees' Retirement and Pension Systems for the year ended June 30, 2026 was 7% of annual payroll, actuarially determined as an amount that, when combined with employee contributions, is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The HCPSS made its share of the required contributions during the year ended June 30, 2026 of \$9,901,029.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources related to Pensions

Employees' Retirement and Pension Systems

As of June 30, 2026, the HCPSS reported a liability of \$75,904,494 for its proportionate share of the net pension liability of the System. The net pension liability was measured as of June 30, 2025, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The HCPSS's proportion of the net pension liability was based on actual employer contributions billed to participating government units for the year ended June 30, 2025. The contributions were increased to adjust for differences between actuarial determined contributions and actual contributions by the State of Maryland. As of June 30, 2025, the HCPSS's proportionate share was 0.295%, which was an increase of 0.007% from its proportion measured at June 30, 2024.

For the year ended June 30, 2026, the HCPSS recognized pension expense of \$12,136,633. At June 30, 2026, the HCPSS reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

Notes to the Basic Financial Statements

	Deferred Outflows of Resources	Deferred Inflows of Resources
Changes in assumptions	\$ 2,720,815	\$ —
Changes in proportion	4,633,218	302,844
Differences between expected and actual experience	9,903,139	888,663
Net difference between projected and actual earnings on pension plan investments	1,267,921	—
Difference between actual and proportionate share of contributions	3	—
HCPSS contributions subsequent to the measurement date	9,901,029	—
Total	\$ 28,426,125	\$ 1,191,507

The \$9,901,029 reported as deferred outflows of resources related to pensions resulting from the HCPSS contributions subsequent to the measurement date will be recognized as a reduction in net pension liability in the year ending June 30, 2027. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending June 30:	
2027	\$ 8,778,588
2028	4,194,623
2029	2,916,065
2030	1,355,552
2031	88,761
Total	\$ 17,333,589

Teachers' Retirement and Pension Systems

At June 30, 2026, the HCPSS did not report a liability related to the Teachers' Retirement and Pension Systems due to a special funding situation. The State of Maryland pays the unfunded liability for the HCPSS and the HCPSS pays the normal cost related to the HCPSS's members in the Teachers' Retirement and Pension Systems; therefore, the HCPSS is not required to record its share of the unfunded pension liability but instead, that liability is recorded by the State of Maryland. The amount recognized by the HCPSS as its proportionate share of the net pension liability, the related state support, and the total portion of the net pension liability that was associated with the HCPSS were as follows:

State's proportionate share of the net pension liability	\$ 638,169,258
HCPSS's proportionate share of the net pension liability	—
Total	\$ 638,169,258

The net pension liability was measured as of June 30, 2025, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

For the year ended June 30, 2026, the HCPSS recognized pension expense of \$105,868,249 and revenue of \$73,173,090 for support provided by the state. Due to the special funding situation noted above related to the Teachers' Retirement and Pension Systems, the HCPSS did not report deferred outflows of resources and deferred inflows of resources related to the Teachers' Retirement and Pension Systems.

Notes to the Basic Financial Statements

Actuarial Assumptions

The total pension liability in the June 30, 2025 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial Cost Method

Actuarial Cost Method	Individual Entry Age
Amortization Method	Level Percentage of Payroll, Closed
Inflation	2.50% price, 3.00% wage
Salary Increases	3.00% to 22.50%
Discount Rate	6.80%
Investment Rate of Return	6.80%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition. Last updated for the 2024 valuation pursuant to the 2024 experience study for the period July 1, 2018 to June 30, 2023
Mortality	Fully generational - PB-2010/MP2018

The assumptions and methods used for funding and financial reporting purposes are in conformity with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

For the 2025 valuation, actuarial assumptions were developed as a result of the Experience Study covering the period from July 1, 2018 to June 30, 2023, which includes the rationale for the assumptions. The assumptions were adopted by the Maryland State Retirement and Pension System Board on July 16, 2024. Actuarial assumptions are based on a combination of future expectations and historical data.

The long-term expected rate of return on pension plan investments was determined using a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-range expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return were adopted by the System's Board after considering input from the System's investment consultant(s) and actuary(ies).

For each major asset class that is included in the System's target asset allocation, these best estimates are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Public Equity	34.0%	5.9%
Private Equity	16.0%	8.5%
Rate Sensitive	20.0%	3.0%
Credit Opportunity	9.0%	5.4%
Real Assets	15.0%	5.9%
Absolute Return	6.0%	3.8%
Total	100.0%	

The above was the System's Board of Trustees adopted asset allocation policy and best estimate of geometric real rates of return for each major asset class as of June 30, 2025.

For the years ended June 30, 2025 and 2024, the annual money-weighted rate of return on pension plan investments, net of the pension plan investment expense, was 9.81% and 6.89%, respectively. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Notes to the Basic Financial Statements

Discount Rate

A single discount rate of 6.80% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 6.80%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Net Pension Liability

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the HCPSS's net pension liability, calculated using a single discount rate of 6.80%, as well as what the HCPSS's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher for the Employees' Retirement and Pension Systems:

	1% Decrease (5.80%)	Current Discount Rate (6.80%)	1% Increase (7.80%)
HCPSS's proportionate share of the net pension liability	\$ 112,856,147	\$ 75,904,494	\$ 45,105,090

Due to the special funding situation noted above related to the Teachers' Retirement and Pension Systems, the HCPSS did not record a net pension liability related to the Teachers' Retirement and Pension Systems.

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in the separately issued System's financial report.

Notes to the Basic Financial Statements

VII - Postemployment Benefits Other Than Pension Benefits (OPEB)

Plan Description

The School System contributes to the Howard County, Maryland Post-Retirement Medical Plan (the plan), a cost-sharing multiple-employer defined benefit post-employment healthcare plan administered by the County. The plan provides medical and life insurance benefits to retired employees of participating governmental entities. The County issues a publicly available financial report that includes financial statements and required supplementary information for the Plan. That report may be obtained by writing to the Howard County Government, 3430 Courthouse Drive, Ellicott City, MD 21043, or by calling 410-313-2195.

Benefits Provided

Retirees eligible for medical insurance benefits pay between 50 percent and 100 percent of the School System's full premium equivalent cost, based upon years of service. Retirees eligible for life insurance benefits pay between 10 percent and 50 percent of the School System's full premium equivalent cost, provided they have at least 10 years of service with the School System and have retired from the School System.

Contributions

Contribution requirements of the plan members and the participating employers are established and may be amended by the Plan's Board of Trustees. Contributions to the OPEB plan by retirees were \$15,807,409, contributions from the School System were \$25,775,727, and contributions from the County on behalf of HCPSS were \$10,377,752 for the year ended June 30, 2026. Employees are not required to contribute to the OPEB plan.

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources related to OPEB

As of June 30, 2026, the School System reported a liability of \$764,997,115 for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of June 30, 2025, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of January 1, 2025. HCPSS proportion of the net OPEB liability was based on the employer's projected long-term contribution effort to the OPEB plan as compared to the total projected long-term contribution effort of all employers and all non-employer contributing entities to determine the employer's proportion. As of June 30, 2026, the HCPSS's proportion was 76.872%.

For the year ended June 30, 2026, the HCPSS recognized an OPEB expense of \$17,750,709. As of June 30, 2026, the HCPSS reported deferred outflows of resources and deferred inflow of resources related to the OPEB plan from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 43,283,912	\$ 152,921,591
Changes in assumptions	160,661,579	424,280,333
Net difference between projected and actual earnings on OPEB plan investments	—	10,011,929
Change in proportionate share of OPEB liability	105,900,555	3,337,457
HCPSS contributions subsequent to the measurement date	36,153,479	—
Total	\$ 345,999,525	\$ 590,551,310

Notes to the Basic Financial Statements

The \$36,153,479 reported as deferred outflows of resources related to OPEB resulting from the School System contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability in the year ended June 30, 2026. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Fiscal Years Ending	
June 30:	
2027	\$ (49,149,050)
2028	(44,721,548)
2029	(43,381,088)

*Only life insurance is valued for these active participants

**These individuals opted out of OPEBs but could later decide to commence OPEBs.

***Averages for HCPSS participants only include those currently enrolled in the medical plan

Actuarial Assumptions

The OPEB liability in the January 1, 2024 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement date of June 30, 2024:

Notes to the Basic Financial Statements

Actuarial Cost Method	Individual Entry Age Normal as a level percentage of payroll; this is the required funding method under GASB Nos. 74 & 75
Roll-Forward Method	Liabilities are rolled forward from the actuarial valuation date to the measurement date, as allowed under GASB Nos. 74 & 75. Liabilities are increased by the normal cost and decreased by benefit payments, and then adjusted with interest to reflect the passage of time.
Recognition of Changes in Proportions	Each component unit may realize an increase or decrease to its Net OPEB Liability attributable to the change in each component unit's proportion of the aggregate Net OPEB Liability (NOL). Per GASB No. 75, this increase or decrease will be recognized as a Deferred Outflow or Inflow of resources, recognized in OPEB Expense equally over a period equal to the Plan's average future service lives in years.
Spouse Age	Male spouses are assumed to be 3 years older, and female spouses are assumed to be 3 years younger. Actual age is used for spouses of current retirees, if provided.
Investment Rate of Return	7.25% as of measurement period ending June 30, 2025
	7.25% as of measurement period ending June 30, 2024
Municipal Bond Yield	4.81% as of measurement period ending June 30, 2025
	4.21% as of measurement period ending June 30, 2024
Discount Rate	5.40% as of measurement period ending June 30, 2025
	4.80% as of measurement period ending June 30, 2024
Actuarial Value of Assets	Market Value
Annual Dental and Vision Trend	4.00%, per annum

For each major asset class that is included in the School System's target asset allocation, these best estimates are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Equities	45%	4.85%
Fixed Income	23%	2.46%
Alternative investments	26%	6.21%
Real Asset investments	6%	4.33%
Total	100%	
Expected Real Rate of Return		4.60%
Inflation Rate		2.65%
Total Investment Rate of Return		7.25%

Discount Rate

The discount rate is the single rate that reflects (1) the long-term expected rate of return on OPEB plan investments that are expected to be used to finance the payment of benefits, to the extent that the OPEB plan's fiduciary net position is projected to be sufficient to make projected benefit payments and OPEB plan assets are expected to be invested using a strategy to achieve that return, and (2) a yield or index rate for 20-year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher (or equivalent quality on another scale), to the extent that the conditions for use of the long-term expected rate of return are not met.

For purposes of calculating the discount rate, projected employer contributions were based on the average trust contribution in excess of pay-go benefit payments for the past 6 years from FY2019 to FY2024, rounded to the nearest million. The total contribution is expected to increase at 3.00% going forward, rounded to the nearest thousand.

Notes to the Basic Financial Statements

Sensitivity of the Net OPEB Liability

Regarding the sensitivity of the OPEB liability to changes in the single discount rate, the following presents the HCPSS' OPEB liability, calculated using a single discount rate of 5.40%, as well as what the HCPSS' OPEB liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher for the discount rate:

Discount Rate	1% Decrease 4.40%	Discount Rate 5.40%	1% Increase 6.40%
Net OPEB liability	\$ 957,494,973	\$ 764,997,115	\$ 611,936,767

The following presents the HCPSS OPEB liability, calculated using a health care cost trend rate 1-percentage-point lower or 1-percentage-point higher:

Ultimate Trend	1% Decrease 3.09%	Health Care Cost Trend Rate 4.09%	1% Increase 5.09%
Total OPEB liability			
Net OPEB liability	\$ 608,658,505	\$ 764,997,115	\$ 968,148,747

Notes to the Basic Financial Statements

Notes to the Basic Financial Statements

IX - Encumbrances

Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is employed as an extension of budgetary integration in the General Fund, and encumbrances outstanding at year-end are reported as assignments of fund balance since they do not constitute expenditures or liabilities.

Encumbrances for the year ended June 30, 2026 are for the following uses:

		General Fund
1	Administration	\$ 70,818
2	Mid-Level Administration	57,310
03/04/05	Instructional	921,517
6	Special Education	412,799

12	Fixed Charges	858,838
14	Community Services	1,707
15	Capital Outlay	2,237
	Total	\$ 9,997,164

Notes to the Basic Financial Statements

X - Commitments and Contingencies

Litigation

The School System has been named as defendant in several lawsuits in the normal course of business, the outcomes of which are uncertain. It is anticipated by the School System that an adverse decision on any or all of these suits would not have a material adverse effect on the financial statements.

Grant Programs

The School System receives grant revenues from County, State, and Federal sources. Amounts received under such programs are restricted to use in accordance with terms of the respective grants. The use of such funds is subject to audit by the grantors. Consequently, the School System is contingently liable to refund amounts received in excess of allowable expenditures, if any. In the opinion of management, no material refunds will be required as the result of expenditures disallowed by the grantors.

Notes to the Basic Financial Statements

XI - Risk Management

The School System is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters, for which the School System participates in the Maryland Association of Boards of Education Group Insurance Pool (Pool). The Pool provides property and casualty insurance as part of a self-insurance program to 19 Maryland county public school districts. The School System pays an annual premium to the Pool for its insurance coverage. The Trust Agreement of the Pool provides that the Pool will be self-sustaining through member premiums and will reinsure through commercial companies for potential claims in excess of established loss limits. Settled claims did not exceed the School System's insurance coverage in any of the past three years.

The School System has also established limited risk management programs for workers' compensation and health and dental insurance. Premiums are paid into these two internal service funds by other funds and are available to pay current and future claims and administrative costs of the programs. The "premium" charged by the self-insurance funds considers recent trends in actual claims experience of the School System as a whole and makes provision for catastrophic losses. As of June 30, 2026, the inter-fund premiums did not exceed reimbursable expenditures in the Health and Dental Self-Insurance Fund or the Workers' Compensation Self-Insurance Fund. Settled claims did not exceed coverage in any of the past five years.

Liabilities are reported when it is probable that a loss will occur and the amount of the loss can be reasonably estimated. An excess coverage insurance policy covers individual health claims in excess of \$1,000,000; and workers' compensation claims have a retention of \$600,000 per occurrence. Liabilities include an amount for claims that have been incurred but not reported (IBNRs). Claim liabilities are calculated considering the effects of inflation, recent claim settlement trends including frequency and amount of pay-outs and other economic and social factors. The liability for claims and judgments is reported in the respective self-insurance internal service funds.

	2026		2025	
	Workers' Compensation	Health and Dental	Workers' Compensation	Health and Dental
Beginning payable, July 1	\$ 6,260,156	\$ 10,491,000	\$ 5,847,475	\$ 9,287,000

Notes to Required Supplementary Information

There were no changes in assumptions for measurement period June 30, 2025 for the year ended June 30, 2026 for the pension liability.

Assumption changes adopted by the Board of Trustees of the Maryland State Retirement and Pension System (MSRPS) that were implemented in the 2024 valuation pursuant to the 2018-2023 Experience Study increased the Unfunded Actuarial Liability (UAAL) by \$914 million for MSRPS.

Changes in Fund Balances of Governmental Funds	Table 3	113
Fund Balances of Governmental Funds	Table 4	115
General Fund Final Approved Operating Budget	Table 5	116
Capital Assets by Function	Table 6	117

Revenue Capacity – Not included. The HCPSS lacks authority to levy taxes.

Debt Capacity – The HCPSS has no authority to issue bond debt. The Howard County Government and the State of Maryland incur bond debt on behalf of the HCPSS to fund capital improvements and are responsible for the liquidation of these debts. In accordance with Board Policy, the HCPSS has the authority to enter into lease agreements.

Computation of Debt Limits	Table 7	120
Outstanding Debt by Type	Table 8	121

Demographic and Economic Information – These schedules offer demographic and economic indicators to help the reader understand the environment within which the Board’s financial activities take place.

*The significant decrease in Unrestricted Net Position is due to the School System implementing GASB 75 which increased expenditures for the School System and was the prime factor for the decrease.

** As restated due to implementation of GASB 84.

Source: HCPSS Finance Department. The Board has adopted the requirements of GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions. This statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. Prior year net position has been restated for this schedule in conformity with GASB 54.

HCPSS has no authority to issue bond debt. The Howard County Government and the State of Maryland incur bond debt on behalf of HCPSS to fund capital improvements and are responsible for the liquidation of these debts. In accordance with Board Policy, HCPSS has the authority to enter into capital lease agreements, limited to no more than 6% of the current operating budget. In addition, HCPSS must limit debt service to 3% of the total operating budget.

2026*	11,705,407	—	11,705,407

* For fiscal years 2013 through 2019, the amounts presented represent capital lease liabilities.

In FY2020, HCPSS adopted GASB 87, Leases and GASB 96, Subscription-Based Information Technology Agreements (SBITAs), which require all leases and SBITAs to be reported as liabilities. The amounts presented for 2020 and beyond represent all leases and SBITAs.

Details regarding HCPSS' outstanding debt can be found in Note V to the financial statements.

* Due to the transition to the PARCC/MCAP assessment, data prior to 2015 is not comparable. The data reported is the % of students scoring a performance level of 4 or 5.

** FY 2015 - Maryland Implemented the Partnership for assessment for Readiness for College and Careers (PARCC) in English language arts and mathematics. The new assessment replaced the Maryland State Assessment (MSA and the HAS. In 2019, the PARCC assessment has been replaced with the Maryland Comprehensive Assessment Program (MCAP). The MCAP is comparable and uses the same scale as the PARCC assessment.

*** SAT and High School Assessment data not available prior to publishing.

**** Due to the school closures related to the COVID-19 pandemic, the PARCC/MCAP assessments were not delivered in 2020 or 2021.
