## Board of Education of Howard County Meeting Agenda Item

Title: $\quad$ SAT and ACT Results for the Graduating Class of 2013 DATE: October 22, 2013
Presenter(s): E. Grace Chesney
Chief Accountability Officer

## Overview:

The SAT is published by the College Board and scored by the Educational Testing Service. The SAT is a standardized test designed to measure high-school level knowledge in three sections: critical reading, writing, and mathematics. Each section is scored on a scale that ranges from 200 to 800 . The maximum total score of 2400 is reported as the composite score and comprises scores from all three sections. Most students take the SAT during their junior or senior year of high school, and almost all colleges and universities consider the SAT, in addition to other student information, when making admission decisions.

The ACT is published by ACT Incorporated. The test assesses high school students' general educational development and their ability to complete college-level work in four skill areas: English, mathematics, reading, and science. It also includes an optional writing test that measures skills in planning and writing a short essay. The score range for each of the four tests is 1 to 36 . The composite score is the average of the four test scores earned during a single test administration, rounded to the nearest whole number. ACT results are accepted by all four-year colleges and universities in the United States.

The 2013 HCPSS mean SAT combined score of 1653 is 21 points greater than the mean SAT combined score of 1632 in 2012.

HCPSS continues to outperform the state and nation on the SAT according to the data for the graduating class of 2013. Among graduating HCPSS seniors, 80 percent took the SAT during high school, compared to 69 percent of public school graduates in Maryland and 43 percent of public school graduates nationally. The average SAT score for HCPSS graduates in the class of 2013 was 1653 , 170 points greater than the average for all Maryland schools (1483) and 155 points greater than the average for all schools nationwide (1498).

## Recommendation/Future Direction:

Targeted and aligned work needs to continue to address gaps between student groups and ensure that all students are receiving a world class educational experience preparing them for career and college success.

Renee A. Foose, Ed.D.
Superintendent

## Background

Vision 2018: Fulfilling the Promise of Preparation clearly articulates goals, outcomes, and strategies for ensuring that every student in the Howard County Public School System (HCPSS) is prepared to succeed in college or a career. Students' SAT and ACT scores are both used as college readiness indicators in HCPSS. Both the SAT and ACT are widely recognized and accepted college entrance exams. This report provides information about the results of the 2013 administrations of the SAT and ACT for HCPSS, Maryland, and the nation. Results are also reported by student group and by school. The report concludes with a discussion of next steps.

The SAT is published by the College Board and scored by the Educational Testing Service. The SAT is a standardized test designed to measure high-school level knowledge in three sections: critical reading, writing, and mathematics. Each section is scored on a scale that ranges from 200 to 800 . The maximum total score of 2400 is reported as the composite score and comprises scores from all three sections. Most students take the SAT during their junior or senior year of high school, and almost all colleges and universities consider the SAT, in addition to other student information, when making admission decisions.

The ACT is published by ACT Incorporated. The test assesses high school students' general educational development and their ability to complete college-level work in four skill areas: English, mathematics, reading, and science. It also includes an optional writing test that measures skills in planning and writing a short essay. The score range for each of the four tests is 1 to 36 . The composite score is the average of the four test scores earned during a single test administration, rounded to the nearest whole number. ACT results are accepted by all four-year colleges and universities in the United States.

## SAT Results

HCPSS continues to outperform the state and nation on the SAT according to the data for the graduating class of 2013. Among graduating HCPSS seniors, 80 percent took the SAT during high school, compared to 69 percent of public school graduates in Maryland and 43 percent of public school graduates nationally. The average SAT score for HCPSS graduates in the class of 2013 was 1653,170 points greater than the average for all Maryland schools (1483) and 155 points greater than the average for all schools nationwide (1498) (Figure 1).

Figure 1. SAT Performance of 2013 Graduates in HCPSS, Maryland, and the Nation

Note. All MD Schools and All US Schools include graduates who were enrolled in a public, religiously affiliated, independent or another school type.

The 2013 HCPSS mean SAT combined score of 1653 is 21 points greater than the mean SAT combined score of 1632 in 2012 (Table A1). Overall, the mean SAT combined score increased from 2012 to 2013 for all student groups except for students who reported two or more races, students receiving special education services, and students receiving English for Speakers of Other Languages (ESOL) services. Of note, the mean SAT combined score for the 2013 Black/African American graduates and Hispanic/Latino graduates were 26 and 32 points higher, respectively, than that of their peers in the graduating class of 2012. The mean SAT combined score for 2013 graduates who received FARMS services was 34 points higher than their peers in 2012 (Table A1).

Also noteworthy, 11 of the 12 HCPSS high schools' mean SAT combined scores were greater than the national average of 1498 . Five out of the 12 high schools' mean SAT combined scores were greater than 1650, a college readiness indicator (Table A2). The attached Tables A1 through A7 provide data on SAT participation and performance by student group and school.

## ACT Results

Every year, 1.6 million students nationally take the SAT, and an equal number of students take an alternative college entrance exam, the ACT. Most colleges and universities accept scores from either assessment. While students in this region of the country have typically taken the SAT, the ACT is becoming an increasingly popular alternative, and this trend is also observed in HCPSS. Historically, most students in Howard County have opted to take the SAT. However, in recent years, many Howard County students are taking both assessments. Twenty-three percent of HCPSS graduates in the class of 2013 took the ACT, an increase of 3 percentage points over the 2012 graduating class. A small percentage of students chose to take only the ACT (less than percent in 2013, Table C1). Student choice is driven by the type of test (aptitude as measured by the SAT or achievement as measured by the ACT) and the
requirements of the college or university to which the student is applying. Though the assessments have differences, they are equally valued in the college admission process.

The HCPSS average ACT composite score continues to be greater than the national and state averages. The average ACT composite score in 2013 was 20.9 nationally, 22.3 in Maryland, and 24.2 in HCPSS (Table 1).

Table 1. Average ACT Composite Score for HCPSS, Maryland, and the Nation, 2011 to 2013

| Region | 2011 | 2012 | 2013 |
| :--- | :---: | :---: | :---: |
| HCPSS | 24.0 | 23.9 | 24.2 |
| Maryland | 22.1 | 22.1 | 22.3 |
| Nation | 21.1 | 21.1 | 20.9 |

Note. HCPSS numbers are based on data verified by HCPSS and may not reflect the numbers reported by ACT Inc.

Among the ACT content subtests, HCPSS students' scores also continue to outpace national and Maryland scores. In 2013, the average score for English was 23.7 among HCPSS students, compared to 21.6 for the state and 20.2 nationally. The HCPSS mathematics average score was 24.4, compared to 22.2 for Maryland and 20.9 for the nation. The average reading scores were 24.3 for HCPSS, 22.3 for Maryland, and 21.1 for the nation. The average science score was 23.8 for HCPSS, 21.7 for Maryland, and 20.7 for the nation (Table 2).

Table 2. Average Content Score on ACT:
HCPSS, Maryland, and the Nation, 2012 to 2013

|  | Reading |  | Mathematics |  | English |  | Science |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2012 | 2013 | 2012 | 2013 | 2012 | 2013 | 2012 | 2013 |
|  | 23.9 | 24.3 | 24.2 | 24.4 | 23.5 | 23.7 | 23.5 | 23.8 |
| HCPSS | 22.3 | 22.2 | 22.2 | 21.8 | 21.6 | 21.6 | 21.7 |  |
| Maryland | 22.2 | 22.3 |  |  |  |  |  |  |
| Nation | 21.3 | 21.1 | 21.1 | 20.9 | 20.5 | 20.2 | 20.9 | 20.7 |

Note. HCPSS numbers are based on the data verified by HCPSS and may not reflect the numbers reported by ACT Inc.

The attached Tables B1 and B2 provide data on HCPSS students' ACT participation and performance by student group and by school.

## SAT/ACT as a College Readiness Indicator

ACT defines college readiness as enrolling and succeeding in credit-bearing, first-year postsecondary courses without any remediation. Many community colleges accept an SAT mean score of 550 on each subtest for entry into credit-bearing courses. As stated above, the percentage of students taking the ACT test is increasing. An SAT combined score of 1650 (an average of 550 on each of the three subtests) corresponds to an ACT composite score of 24 according to a report by the College Board. Therefore, HCPSS has defined college readiness as attaining an SAT score of 1650 or higher or an ACT score of 24 or higher.

Tables C1 and C2 provide information on SAT and ACT participation and performance in HCPSS as well as the percentage of students meeting the college readiness indicator by student group and school. Students can take the SAT multiple times and students can select score(s) from specific test date(s) to send to their chosen institutions. In other words, students may choose to send only their highest SAT score from one test administration. Therefore, the college readiness indicators as seen in Tables C1 and C2 are based on the highest SAT or ACT score in one test administration.

Almost 55 percent of 2013 HCPSS high school graduates were deemed college ready according to the SAT/ACT indicator. There was a slight increase in Black/African American and Hispanic/Latino graduates ( 0.7 percentage points and 3.5 percentage points, respectively) who met SAT/ACT college readiness criteria. Table C2 shows variation in college readiness between schools. Seven schools as a whole met the college readiness criteria, either by the SAT and/or the ACT score average. Variation also exists among student groups in meeting the college readiness criteria. While 54.8 percent of students overall met the college readiness indicator, only 21.0 percent of Black/African American and 38.1 percent of Hispanic students did so. As for students receiving FARMS, only 18.7 percent met SAT/ACT college readiness criteria and only 21.0 percent of students in special education services did so.

## Conclusion and Next Steps

Students in HCPSS continue to perform at high levels on the SAT and ACT when compared with their peers in Maryland and throughout the nation. Improvement in the SAT and ACT is evidenced when comparing the 2012 scores with the current 2013 results. Despite the strong overall scores, gaps exist for student groups including Black/African American and Hispanic, and for students receiving special services (FARMS and special education).

Currently, many supports and strategies are in place to support all students in achieving the college readiness indicator level on the SAT. These supports are in two main categories: SAT test preparation and test registration. Examples of these supports include the following:

## SAT Preparation

- After school preparation program (selected schools)
- In-school half-semester SAT preparation class
- Recommendations from school counselors to students regarding community resources, books, computer programs to support students in studying for the SAT

## SAT Participation

- Leveraging data available through the Naviance database to target students who have not taken the SAT and encouraging their participation

Systemic strategies have traditionally focused more on the SAT than the ACT. As both measures are important in preparing students for college, targeted ACT preparation programs should be considered for implementation. Targeted, intentional efforts need to be implemented to identify the contributing factors for the identified gaps between student groups in the rate at which each group's SAT/ACT performances demonstrate their readiness for college. When these factors become more apparent, locally-relevant strategies to eliminate those gaps can then be developed for integration into the school improvement process.

Note. Results are not reported (--) for groups with fewer than ten graduates. Percentage rates that are greater than or equal to $95 \%$ or less than or equal to $5 \%$ will be reported as $\geq 95$ or $\leq 5$
respectively and numerator will be reported as * to protect student confidentiality. Results for American Indian and Pacific Islander students are included with all students but are not reported separately. Graduates enrolled in Special Schools are included with all students. Graduates enrolled in Special Schools are included with all students. SAT and ACT scores are based on the highest score obtained in one test administration.

[^0]:    
     Schools are included with all students. SAT and ACT scores are based on the highest score obtained in one test administration.
    FARMS = Free and Reduced Price Meals System
    ESOL = English for Speakers of Other Languages
